**QUESTION 1**

A customer is performing backups of their desktop/laptop clients to an Avamar server. They plan to add a secure Oracle database server as a new backup client. They are concerned about the security of the database data since no data is being encrypted when it is stored on the Avamar.

What is a consideration of enabling encryption at rest?

- A. The amount of storage capacity will be reduced.
- B. Only new clients will have encrypted data.
- C. The desktop/laptop backups will become inaccessible.
- D. Data encryption is not available for Oracle data.

Correct Answer: A

QUESTION 2

You are asked to design an EMC NetWorker backup solution for a large Microsoft Exchange 2010 DAG environment. Their backup requirements are: Leverage Microsoft VSS to create consistent snapshots of Exchange mailbox database. Keep the last two snapshots on the disk array for instant recovery. Use NetWorker to schedule and manage the snapshots and roll the last snapshot over to a Data Domain system.

What is a design consideration?

- A. Exchange mailbox database and transaction logs need to be backed up at the same time.
- B. Using NetWorker wizard to create client resources for all Exchange 2010 DAG members.
- C. NetWorker save set should be set to '\\All\\' to back up all Exchange 2010 DAG members.
- D. Using an EMC VSS hardware provider for the rollover operation.

Correct Answer: A

QUESTION 3

A data center company is using two EMC NetWorker servers (NetWorker_A and NetWorker_B). Each server has three storage nodes to protect 650 server applications and data. The total amount of data being backed up is 100 TB. NetWorker_A server protects 60 TB and NetWorker_B server protects 40 TB.

To minimize cost and ease licensing management for NetWorker, the company decided to switch from a traditional licensing model to a capacity licensing model.

How many licenses are needed to support the company's requirements?

- A. 2 Source Capacity Datazone Enabler and Source Capacity 10 TB tier 4 licenses
- B. 2 Source Capacity Datazone Enabler and Source Capacity 10 TB tier 3 licenses
- C. 2 Base license and 10 Source Capacity TB tier 3 licenses
- D. 2 Source Capacity Datazone Enabler and 650 Standard Client Connection licenses

Correct Answer: D

QUESTION 4

An EMC NetWorker customer is considering backup options for their VMware environment. What is an advantage of using the VMware Console Backup option?

- A. File-level restore granularity
- B. No proxy server is required
- C. No load on the ESX server during backups
- D. Application backup data is crash-consistent

Correct Answer: B

QUESTION 5

A customer wants to determine how much data can be transmitted in their network. The network environment includes the following:

LAN speed = 4 Gb Bandwidth = 50 Mbps RTT = 50 ms

What is the customer's bandwidth delay product (BDP)?

- A. 2000 bytes
- B. 76 Kb
- C. 305 Kb
- D. 5 MB

Correct Answer: C
