**QUESTION 1**

A new EMC NetWorker customer has decided to use the traditional licensing model even though they have a large number of licenses that they will need to load.

Which option is available to quickly install these licenses?

- A. Download an nsradmin file from Powerlink and import the file
- B. Download a text file of license keys and import through the NetWorker Management Console
- C. Check for licenses automatically with the License Conformance Reporter
- D. Copy and paste the licenses from the automatically generated e-mail

Correct Answer: A

QUESTION 2

You are redesigning an EMC NetWorker customer's backup solution. Currently some of the file system clients are backing up to an Avamar deduplication node.

The customer wants to back up these clients to a new Avamar deduplication node.

What is an implication of this decision?

- A. New instance of each client must be created on the NetWorker server
- B. New full deduplication backup of each client is required
- C. Clients must first be retired on the old deduplication node
- D. All previously backed up data must first be replicated to the new deduplication node

Correct Answer: B

QUESTION 3

A customer has decided on EMC Avamar as a solution. They are trying to decide on the amount of nodes to purchase. They want maximum storage capacity.

What is a recommended maximum number of data nodes for an initial Avamar server configuration?

- A. 7
- B. 8
- C. 14

D. 16

Correct Answer: C

QUESTION 4

Refer to Scenario

When using EMC NetWorker and DD Boost, what are the recommended maximum concurrent backups for the VADP proxy server?

B. 50

C. 100

D. 160

Correct Answer: C

QUESTION 5

An EMC Avamar customer is running a backup that is being written to a Data Domain system. The Data Domain cleaning runs at 8 M. on Tuesday mornings. Avamar maintenance runs daily at 6 M. A backup has completed successfully; however, it is no longer needed. The customer manually deletes the backup on Wednesday afternoon.

When is the first opportunity for space to be reclaimed on the Data Domain system?

A. At the next Data Domain file system cleaning

B. Immediately on the Data Domain system

C. At the next scheduled Avamar garbage collection

D. When manually deleted from the Data Domain system

Correct Answer: A
