**QUESTION 1**

A systems administrator wants to configure Data Mover networks for very high availability. Performance is somewhat important, but not as important as high availability. Only one network switch is available. Every physical port on the Data Mover may be used for this solution.

Which Celerra networking solution would meet this requirement?

- A. VLAN
- B. FSN
- C. LACP
- D. GIGE

Correct Answer: C

---

**QUESTION 2**

How are the endpoints of a Transport layer communication defined?

- A. Locks
- B. Mailslots
- C. Ports
- D. Slots

Correct Answer: C

---

**QUESTION 3**

You are implementing a Celerra CIFS solution in a mixed NFS and CIFS user environment. Local passwd and group files are placed on the Data Movers, which are also configured for LDAP.

Which search order is used for user mapping?

- A. Secmap, then local passwd and group files
- B. LDAP, then local passwd and group files
- C. Local passwd and group files, then LDAP
- D. Secmap, then Usermapper

Correct Answer: A

---

#### QUESTION 4

The SavVol High Water Mark (HWM) is set to 0 when a scheduled checkpoint is created. What action is triggered by SnapSure when SavVol is at 90% capacity and there is available disk space?

- A. Data in oldest checkpoint is deleted and the space is recycled.
- B. Data in oldest checkpoint is automatically copied to tape.
- C. Data in most recent checkpoint is deleted and the space is recycled.
- D. SavVol is automatically extended when near-full capacity is reached.

Correct Answer: A

---

#### QUESTION 5

What is a minimum requirement when creating a file system using Manual Volume Management?

- A. Metavolume
- B. Mirror volume
- C. Sliced volumes D. Striped volumes

Correct Answer: A
