**QUESTION 1**

A customer has a Symantec NetBackup environment with an EMC Data Domain system using the CIFS transport protocol. You have been tasked with configuring and testing backup functionality between NetBackup and the Domain system. What is the correct sequence of steps for creating and validating a backup?

Select and Place:

Steps

Configure a backup policy

Configure a disk storage unit

Verify files on the Data Domain system

Perform a manual backup

Monitor the backup

Steps in Sequence

Step 1

Step 2

Step 3

Step 4

Step 5

Correct Answer:

Steps**Steps in Sequence**

Configure a disk storage unit

Configure a backup policy

Perform a manual backup

Monitor the backup

Verify files on the Data Domain system

QUESTION 2

As an administrator, you are configuring the data movement policy of an EMC Data Domain system enabled with Extended Retention.

On which attribute is this policy based?

- A. Last modified time of every file stored in the system and frequency of data movement
- B. First modified time of every directory stored in the system and frequency of data movement
- C. File pointers to every file stored in the system and time stamps of each file in all directories
- D. Last modified time of each directory stored in the system and frequency of updates to each directory

Correct Answer: A

QUESTION 3

On an EMC Data Domain system, which licensed software option allows an administrator to protect data from deletion by the backup software?

- A. Retention Lock
- B. Snapshots
- C. Replicator
- D. Fastcopy

Correct Answer: A

QUESTION 4

Which method of deduplication yields better deduplication results for multiple data types?

- A. Variable segment size due to its ability to split the data stream into segments
- B. Variable segment size due to its ability to add data to a variable segment and move the data stream
- C. Fixed segment-based due to its ability to allow sub-file chunking of data
- D. Fixed segment size due to its ability to add data to a fixed segment and move the data stream

Correct Answer: A

QUESTION 5

A customer wants to use the 10 GigE interfaces in their EMC Data Domain system for link failover.

How many interfaces can be added to the bonding group?

- A. 2

B. 3

C. 4

D. 6

Correct Answer: A
