**QUESTION 1**

The dm_error utility provides what service in troubleshooting?

- A. It provides information on server messages.
- B. It lists the errors from workflow activities owned by a user.
- C. It returns all messages from the session at or above a specified severity level.
- D. It returns a value from the error attribute of a session configuration object.

Correct Answer: A

QUESTION 2

One has an application that nightly ingest approximately 300,000 objects and at the same time does content migration to the same amount of objects to a low cost storage. This process is taking too long causing the end user client to be slow in the morning. Which approach should you use to speed up the ingestion and migration?

- A. Use the Consistency Checker administrative tool to verify the data integrity to ensure fast operations.
- B. Enable High-Volume Server's batch mode to process objects in batches.
- C. Use Dmclean and Dmfilesan tools to clean the repository of all excess objects slowing down operations.
- D. Enable Content Storage Services to automate the migration.

Correct Answer: B

QUESTION 3

What is a resource agent?

- A. It is a JMX-based monitoring tool that is accessible using Documentum Administrator.
- B. It is a feature of Application Builder, used to help manage lifecycles.
- C. It is a process used in conjunction with the Index Server to provide full-text indexing.
- D. It is a feature of WDK which allows administrators to more easily deploy components given to them by a developer.

Correct Answer: A

QUESTION 4

After a new Webtop installation, users are reporting the following error when editing or viewing a document: Failed to retrieve content from ACS/BOCS servers(s). The ACS/BOCS server(s) may be down or your machine may not be able to reach the server(s) due to network connectivity or configuration issues.

com.documentum.ucf.common.UCFException: All remote hosts failed... What could be the problem?

- A. The Unified Content Facilities (UCF) have not deployed properly to the client workstations.
- B. The host name in the acs_base_url attribute of the Accelerated Content Services (ACS) configuration object is not known on the client side.
- C. There is an error with the Branch Office Caching Services (BOCS) definition in the Webtop app.xml file.
- D. An incorrect host or port number is specified in the [DOCBROKER_PRIMARY] section of the dmcl.ini on the application server hosting Webtop.

Correct Answer: B

QUESTION 5
