QUESTION 1

What are the minimum prerequisite components for a Documentum Administrator installation on a dedicated application server host?

A. database client, application server, and Java SDK

B. application server, Java SDK, and web server

C. application server and Java SDK

D. application server, Java SDK, PHP, and Perl

Correct Answer: C

QUESTION 2

You have a client with offices on four different continents. They have a primary repository located in the United States, which they want to share with all offices. The offices outside of the U.S. have very minimal IT support available. The content is mostly read-only, with most of the updates done in the

A. S. The same content is used at all the remote locations. The content files are very large, and take a long time to download at the remote locations. What repository configuration would require the least IT support at the remote offices and still deliver a local copy of frequently-used content?

B. place a Content Server at the U.S. site with distributed filestores at each remote site

C. place a Content Server at the U.S. site and place Branch Office Caching servers at the remote sites

D. place Content Servers at all sites and use replication to move the shared content from the primary repository to the content servers at the remote sites

E. place a content server at the US site with distributed filestores at each remote site and use replication to move the shared content from the primary repository to the content servers at the remote sites

Correct Answer: B

QUESTION 3

Your system operates with a single centralized site with users at several remote locations. The network provides minimal hops between routers, quick round trip response times, and high data capacity. However, users report poor application performance, and you have narrowed possible root causes to the network. Spam e-mail on the network is affecting performance of all enterprise applications. What network metric indicates the actual network capacity in this case?

A. latency

B. bandwidth

C. throughput

D. protocol overhead

Correct Answer: C

QUESTION 4

How can you improve the performance of WDK-based applications on a high-latency network?

A. set dfc.content.use_compression = true in the dfc.properties file

B. enable the WDK Response compression filter in the web.xml configuration file

C. enable the content compression setting in both the web.xml and dfc.properties configuration files

D. enable the WDK Cache control filter in the web.xml configuration file

Correct Answer: D

QUESTION 5

How do you turn off the mandatory access control (MACL) capability from your repository?

A. issue the DQL statement: update dm_sysobject (all) objects set r_composite_label = \\'acl\\' where r_composite_label = \\'macl\\'

B. set the attribute macl_security_disabled to true on the dm_docbase_config object

C. update the system default ACL to have the attribute i_has_required_groups as false

D. change the dm_server_config objects r_trusted_mode attribute from \\'macl\\' to \\'acl\\'

Correct Answer: B
