QUESTION 1

Refer to the exhibit.

Auditing is enabled for the Process Template and the structured data type is marked as reportable in the definition of Activity-1. A report designer has a table report but only sees completed workflows. There are no in-flight processes displayed in the list.

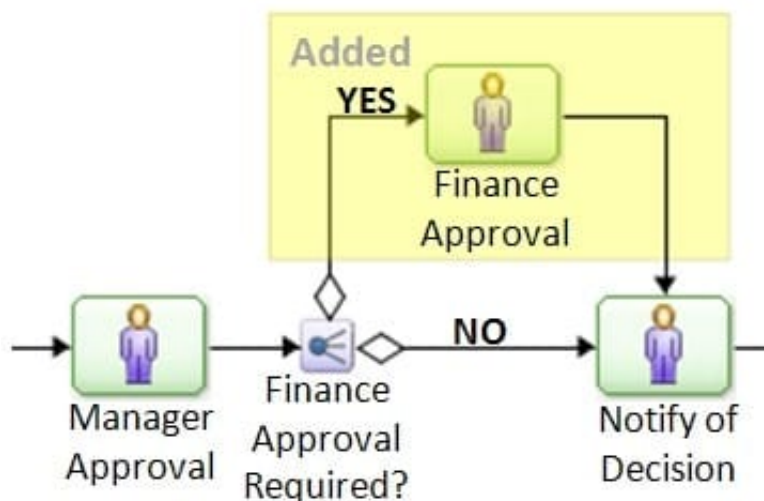

What is the cause of this behavior?

- A. There are incorrect permissions on in-flight process instances.
- B. Data for processes that have not completed Activity-1 are not written to the BAM database.
- C. The audit trail table for the repository is full.
- D. The structured data type is not marked as reportable in the definition of Activity-2.

Correct Answer: B

QUESTION 2

Refer to the exhibit.

A new activity is added to an existing process, along with a decision split. However, in the new version of the process, the activity Notify of Decision never appears in the user's inbox regardless of whether finance approval is required. No

other changes were made to the process. What is the most likely cause of the issue?

- A. The transition definition was set incorrectly on the Finance Approval activity.
- B. The triggers were set incorrectly on the Notify of Decision activity.
- C. The triggers were set incorrectly on the Finance Approval activity.
- D. The transition definition was set incorrectly on the Finance Approval Required? activity.

Correct Answer: B

QUESTION 3

Which process data attributes can be used when building transition conditions for an activity within a process?

- A. attachment
- B. registered table
- C. package
- D. task form

Correct Answer: C

QUESTION 4

How can an error message be returned from the document validator adaptor on a form to help diagnose an issue?

- A. Return the message from the adaptor in a string instead of returning true or false.
- B. Return an error code from the adaptor and map that error code to an error message in Forms Builder.
- C. Throw an exception from the adaptor with the error message.
- D. Use the Message Manager to return the string.

Correct Answer: C

QUESTION 5

Which core xCP component is responsible for aggregating business process reporting information?

- A. Process Reporting Services
- B. Business Activity Monitor
- C. Process Engine
- D. Documentum Reporting Services

Correct Answer: B
