**QUESTION 1**

A customer is planning to migrate data belonging to two applications (A and B) from an older array to a new Symmetrix VMAX. Both migrations will run in parallel. However, it is necessary to transfer data from application A (session A) as fast as possible. The data from application B (session B) can be transferred at a slower rate.

Which settings should be used to run the two sessions?

- A. The pace of session A should be set to 0. The pace for session B should be set to 9.
- B. The pace for session A should be set to 9. The pace for session B should be set to 0.
- C. Session A should be assigned to a Fibre Channel director with a ceiling setting of 100. Session B should be assigned to a different director with a ceiling value of 10.
- D. Session A should be assigned to a Fibre Channel director with a ceiling setting of 10. Session B should be assigned to a different director with a ceiling value of 100.

Correct Answer: A

QUESTION 2

Two SRDF/A sessions are grouped together to be managed using Multi-Session Consistency.

What happens to cycle switching if Session 1 completes its current Transmit cycle before Session 2 can complete its current Transmit cycle?

- A. Cycle switch for both sessions will be delayed
- B. Both sessions will be dropped
- C. Cycle switch for Session 1 will proceed independently of Session 2
- D. Cycle switching will be suspended for both sessions

Correct Answer: A

QUESTION 3

Which status shows that a Virtual LUN migration is complete?

- A. Migrated
- B. Synchronized
- C. Established
- D. Copied

Correct Answer: A

QUESTION 4

Which Unisphere for VMAX task must be performed to allow Unisphere to collect performance data on a Symmetrix array?

- A. System Registration
- B. Set up Real Time Traces
- C. Create Dashboards
- D. Set up recurring BTP report

Correct Answer: A

QUESTION 5

A customer has used Federated Live Migration to migrate 20 devices to a Symmetrix VMAX. After the migration completes, what is required before the customer can remove the federated identities of the new VMAX devices?

- A. Applications must be shut down
- B. Device allocation must be removed
- C. There is no requirement before removing identities
- D. Host rescan and a PowerPath reconfiguration

Correct Answer: A
