QUESTION 1

An EMC Disk Library customer is considering using Remote Copy between two engines. A policy will be configured to copy data when 50 MB of data is sent to the virtual tape. How does the data transfer occur?

A. Whole content of the virtual tape is sent to the target once the first 50 MB is stored in the buffer

B. Incremental data is sent to the target engine when the virtual tape is unmounted and 50 MB of new data has been written

C. Incremental data is sent immediately to the target engine as soon as 50 MB of new data is received by the virtual tape during the backup process

D. Incremental data is sent to the target in 50 MB increments whenever the virtual tape is idle

Correct Answer: B

QUESTION 2

When does the Avamar server run garbage collection?

A. During the morning and evening cron jobs

B. During the blackout window

C. During the maintenance window

D. During the morning cron job

Correct Answer: B

Blackout Window. The portion of each day reserved for performing server maintenance activities (primarily checkpoint and garbage collection) that require unrestricted access to the server.

Operational Impact	No backup or administrative activities are allowed during the blackout window. You can perform restores.
Default Settings	The default blackout window begins at 8 a.m. local server time and continues uninterrupted for three hours until 11 a.m. that same morning.

QUESTION 3

By default, which database is automatically deployed on the Data Protection Advisor server?

A. MSDE

B. PostgreSQL

C. MySQL

D. Anywhere

Correct Answer: D

The DPA Server component is the core component of the product. The server manages all data stored within the system and provides the methods for the user to view data and to receive alerts. The Server component can run on either Solaris, Windows, or Linux. DPA can work with an embedded iAnyWhere database that is automatically installed on the server during the install process, or with an external database that must be supplied and managed by the customer. DPA supports the following external databases: ?Oracle in Solaris environments ?Microsoft SQL Server in Windows environments ?Oracle and PostgreSQL in Linux environments

QUESTION 4

A customer requires a backup solution that provides a monthly backup to tape for long- term retention and daily backups to disk. They also want to minimize their backup storage requirements and the amount of daily backup traffic that travels over the network. Which EMC backup solution would you recommend?
A. NetWorker with Avamar

B. NetWorker alone

C. Avamar alone D. Avamar with Data Domain

Correct Answer: A

QUESTION 5

How many replication contexts are configured in the EMC Data Domain environment represented in the exhibit?

A. 1

B. 2

C. 3

D. 4

Correct Answer: D
