QUESTION 1

A company located in Amsterdam has recently acquired a company in Rome. Since both locations have their own file servers containing sensitive data, they want to backup everything to their central backup repository in Amsterdam.

The customer only has a 2 Mb/s connection between both locations. What is the best EMC product to back up everything to the Amsterdam office?

A. Avamar

B. NetWorker

C. Data Domain

D. HomeBase

Correct Answer: A

QUESTION 2

Which EMC NetWorker policy is configured to define the length of time that records are retained in the Client File Index?

A. Retention

B. Backup

C. Staging

D. Browse

Correct Answer: D

QUESTION 3

A customer\\'s environment currently has a backup window that exceeds the replication window. Which Data Domain characteristic will solve this issue?

A. Post-process deduplication

B. Variable-length segment size

C. Fix-length segment size

D. Inline deduplication

Correct Answer: B

QUESTION 4

By default, which database is automatically deployed on the Data Protection Advisor server?

A. MSDE

B. PostgreSQL

C. MySQL

D. Anywhere

Correct Answer: D

The DPA Server component is the core component of the product. The server manages all data stored within the system and provides the methods for the user to view data and to receive alerts. The Server component can run on either Solaris, Windows, or Linux. DPA can work with an embedded iAnyWhere database that is automatically installed on the server during the install process, or with an external database that must be supplied and managed by the customer. DPA supports the following external databases: ?Oracle in Solaris environments ?Microsoft SQL Server in Windows environments ?Oracle and PostgreSQL in Linux environments

---

QUESTION 5

A customer has a Symantec NetBackup environment at two locations, each with EMC Data Domain as the target for backups. They are replicating data between the two sites.

The customer now requires that the Media/Master server is aware of both Data Domain systems for restoring files. Which feature meets this requirement?

A. DD Boost

B. Pool Replication

C. Directory Replication

D. SISL

Correct Answer: A
