- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

A customer, using Avamar version 4, wants to use VMware Consolidated Backup (VCB) to back up their version 3.x ESX servers. Which operating system(s) can they run on their proxy server?

- A. Microsoft Windows 2003 and Red Hat Enterprise Linux 4
- B. Microsoft Windows 2003
- C. Microsoft Windows 2003 and Windows 2008
- D. Red Hat Enterprise Linux 4

Correct Answer: B

Avamar VCB Interoperability Module. The Avamar agent and the interoperability module run on the Consolidated Backup proxy server to provide the backup services. One backup server can provide backup services to many ESX server hosts, as long as all machines share the same SAN (storage area network). With this approach, users have several advantages. By consolidating backups onto fewer proxy servers, backup can be simplified and backup licensing costs for VMware environments can be reduced. VCB reduces the load on the ESX Server during backups, eliminating the need to manage backup agents in each virtual machine. And, because of its method of transferring data using the SAN, LAN traffic associated with backup is reduced. With this approach, there is no direct application integration as is possible with guest backups using Avamar database plug-ins.

Note: Backup proxy server supported on Windows 2003 server only.

**QUESTION 2**

Which technology is used in an EMC Disk Library to provide tolerance against a double drive failure?

- A. RAIN
- B. RAID 6
- C. Remote Copy
- D. Active Engine Failover

Correct Answer: B

---

**QUESTION 3**

A new backup and recovery solution needs to be designed for a customer with the following characteristics:

Large NAS servers in the data center Three-month retention period

In addition, the customer has a number of small remote offices that need to be protected with minimal operational cost. Which product is most suitable to address this environment?

- A. Avamar

- B. HomeBase
- C. Data Domain
- D. NetWorker with a deduplication node

Correct Answer: A

---

#### QUESTION 4

An administrator wants to back up an EMC Celerra with Avamar using a single NDMP accelerator node. Based on EMC best practices, what is the maximum number of files that can be backed up per backup job?

- A. 5 million
- B. 10 million
- C. 15 million
- D. 20 million

Correct Answer: B

---

#### QUESTION 5

Which Data Protection Advisor process allows you to automatically generate reports on a scheduled basis?

- A. Publisher
- B. Reporter
- C. Illuminator
- D. Predictive Analysis Engine

Correct Answer: A
