QUESTION 1

Which EMC NetWorker feature is used to perform a backup based on an event?

A. Application modules

B. Directives

C. Scheduled backups

D. Probe-based backups

Correct Answer: D

Probe-based Group Backups

- Event-driven backups

- Backup of the group is performed based on the result of executing user-created client *probes*

- A *probe* is a user-created program/script configured to run on clients in a probe-enabled group
  - The success (exit 0) of the probe triggers the backup
  - **Probe Interval** determines how often probing occurs (minutes)
  - **Probe Start** and **End** times define the probing window when client probing occurs

QUESTION 2

In an EMC NetWorker environment, where is information about backup data such as owner, size, permissions, and access time stored?

A. Client File Index

B. GST Database

C. Resource Database

D. Media Database

Correct Answer: A

QUESTION 3

A customer wants to purchase Data Protection Advisor (DPA) to support their two EMC Symmetrix arrays. One array is

at the primary site and the other array is at the secondary site. The primary site has 80 TB raw of high-performance drives and the secondary site has 80 TB raw of high-capacity drives for replication. How would the DPA replication analysis option be licensed?

A. One 80 TB high-performance and one 80 TB high-capacity

B. One 80 TB primary site and one 80 TB secondary site

C. One 160 TB high-capacity

D. Two 80 TB Symmetrix

Correct Answer: A

QUESTION 4

An EMC Data Domain customer requires the usage of physical tape for long-term storage. How are backups moved from the Data Domain system to physical tape?

A. Storage node reads data from the Data Domain system and writes it to physical tape

B. Backup server instructs the Data Domain system to perform the operation

C. Data Domain system moves virtual tape contents to the physical library using one of the back-end ports based on a schedule

D. Data automatically flows to the physical tape when the Data Domain system is full

Correct Answer: A

QUESTION 5

A customer is preparing for their Data Protection Advisor (DPA) implementation. Which TCP port needs to be opened to allow the DPA server to talk to a Collector outside the firewall?

A. 3616

B. 3741

C. 4011

D. 9002

Correct Answer: B
