QUESTION 1

A company recently deployed an EMC Avamar Gen4 server with Avamar 6.0 software to protect their data. The backup administrator wants system state protection for their critical Microsoft Windows 2003 servers.

What is the recommended method?

- A. HomeBase embedded feature
- B. Windows Server Backup
- C. NTBackup option
- D. HomeBase embedded with HomeBase server

Correct Answer: A

QUESTION 2

Which time zone is used on EMC Avamar nodes?

- A. Local time on the utility node; GMT/UTC on the storage nodes
- B. GMT/UTC on the utility node; local time on the storage nodes
- C. All node types use the local time
- D. All nodes use GMT/UTC time

Correct Answer: A

Timezone notes

When you select a local timezone for an Avamar server consider the following notes:

- ◆ Use a timezone that is compatible with the maintenance window, as discussed in “Maintenance window compatibility” on page 39.
 - ◆ Consult the local site administrator for a timezone recommendation, as discussed in “Consult the local site administrator” on page 39.
 - ◆ Check whether the timezone observes daylight savings time (DST), as discussed in “Daylight savings time considerations” on page 40.
 - ◆ Where possible, avoid local timezones that ignore local DST laws, as discussed in “Avoid local timezones that ignore local DST laws” on page 40.
 - ◆ Do not use GMT as the local timezone for England, as discussed in “Do not use GMT as local timezone for England” on page 40.
 - ◆ Select the capital city or nearest large city for small countries, as discussed in “Select capital city or nearest large city for small countries” on page 40.
 - ◆ Review the additional resources listed in “Additional timezone resources” on page 40.
-

QUESTION 3

In steady state, what is the approximate rate of data removed from an Avamar grid during a daily garbage collection?

- A. 10 GB per hour per node
- B. 10 GB per hour per grid
- C. 100 GB per hour per node
- D. 100 GB per hour per grid

Correct Answer: A

QUESTION 4

A company has decided to deploy the EMC Avamar software to guest machines in a VMware environment. What is the difference between backing up a guest machine versus a physical machine?

- A. No difference
- B. Image level recovery only
- C. Avamar cannot replicate the backup of the guest machine

D. Deduplication is not as efficient

Correct Answer: A

QUESTION 5

Which RAID level is used in an EMC Avamar 7.8 TB single-node server?

A. 1

B. 5

C. 6

D. 10

Correct Answer: A
