**QUESTION 1**

A company has indicated that they do not want to change the native VLAN for their entire switch. Based on best practice, how should the Top of Rack (ToR) switch be configured?

- A. Set the native VLAN on the switch ISL ports
- B. The native VLAN for the switch must be set
- C. Set the native VLAN only at the VxRail trunk ports
- D. Do not configure ToR switch native VLAN and instead tag the VLAN on VxRail

Correct Answer: A

QUESTION 2

What is a requirement for the Top of Rack (ToR) switches used in a VxRail implementation?

- A. MLD Querier
- B. EtherChannel
- C. IPV4 and IPV6 Multicast
- D. LACP

Correct Answer: C

QUESTION 3

When populating the VxRail Installation wizard for an external vCenter solution, what is the correct format for hostnames?

- A. vCenter and PSC should use FQDN, VxRail Manager should use host name only
- B. VxRail Manager and vCenter should use FQDN; PSC should you host name only
- C. vCenter, PSC, and VxRail Manager should use FQDN
- D. vCenter, PSC, and VxRail Manager should use host name only

Correct Answer: D

QUESTION 4

You have been asked to deploy a single, 4 node VxRail cluster for company. They would like to perform an online migration from their existing vSphere 6.0u2 environment. They have also asked that vCenter Enhanced linked-mode be supported. Based on best practice, what is the recommended deployment model?

- A. Use existing vCenter with External PSC
- B. Deploy Internal vCenter with External PSC
- C. Use existing vCenter with Embedded PSC
- D. Deploy Internal vCenter with Embedded PSC

Correct Answer: A

QUESTION 5

A company wants to leverage their existing VMware vCenter Server for a new VxRail deployment. Which entitles should already exist on the external vCenter Server for use by VxRail before the VxRail deployment?

- A. Data center and cluster
- B. Cluster and root level user
- C. Root level user, cluster, and data center
- D. Data center and root level user

Correct Answer: B
