**QUESTION 1**

An ESRS deployment on a VxRail system with external vCenter fails with "Invalid target datastore specified".

What is required to resolve this problem?

- A. Open a Service Request to involve support
- B. Retry deployment through the retry button
- C. Manually deploy ESRS
- D. Restart vCenter services and retry the deployment

Correct Answer: D

---

**QUESTION 2**

During a node add procedure the new node cannot be discovered. A ping to the IPv6 address is responding.

What could be the cause of this issue?

- A. Only one network interface is up on the new node
- B. vSAN VLAN is not configured correctly
- C. Management VLAN ID is not set on the vmk0 interface
- D. Loudmouth process is not running

Correct Answer: A

---

**QUESTION 3**

What is the Dell EMC product that is purpose-built for departmental and edge applications, as well as small enterprise and mid-market data centers?

- A. Vscale Architecture
- B. VxRail
- C. VxRack
- D. Vblock/VxBlock

Correct Answer: B

---

**QUESTION 4**

During a VxRail installation, the deployment fails at 9%. Based on the exhibit, what could be the reason for this failure?

```
    },
    "vcenter": {
      "ip": ""
    },
    "psc": {
      "ip": ""
    },
    "evorail": {
      "ip": "192.168.80.12"
    }
  },
  "hostnames": {
    "hosts": {
      "prefix": "vxrail-ctl-eax",
      "separator": "",
      "iterator": "NUMERIC_N"
    },
    "tld": "vlab.local",
    "vcenter": "",
    "psc": "",
    "evorail": "vxrail-ctl-manager"
  },
  "passwords": {

    "loginsightHostname": "",
    "syslogServerCSV": "",
    "ntpServerCSV": "192.168.80.1",
    "dnsServerCSV": "192.168.80.1",
  }
}
```

The screenshot shows a VxRail deployment interface. On the left, a configuration file is displayed with JSON syntax. On the right, a red warning icon is shown above the text "We experienced a problem". Below this, there is a progress bar indicating 9% completion. A red button labeled "BY ADMIN" is visible at the bottom right of the error message area.

- A. Domain name .local is not supported
- B. Password field has an extra space
- C. vCenter and PSC information is missing
- D. Timezone is in an incorrect format

Correct Answer: C

**QUESTION 5**

A company wants to deploy VxRail on V Series nodes as a proof-of-concept (POC). Only one Top of Rack (ToR) switch has been provided for the POC. What is the Dell EMC best practice recommendation in this situation?

- A. Connect the first host NIC to the ToR switch. Leave the second host NIC un-cabled.
- B. Connect each host NIC to a port on a different switch packet buffer bank on the ToR switch. Balance the ports across two packet buffer banks.
- C. Inform the company that the POC cannot proceed without a second ToR switch.
- D. Connect the first host NIC to the TOR switch. Daisy chain the second NIC between hosts.

Correct Answer: B
