**QUESTION 1**

Your development team needs to include SAP HANA objects into an ABAP workbench request. You want to use SAP HANA Transport for ABAP (HTA) and NOT the SAP HANA Transport Container (HTC).

Why would you choose HTA?

Note: There are 2 correct answers to this question.

- A. Because you can manually re-deploy objects after a failed import
- B. Because you always transport entire SAP HANA content packages
- C. Because you use the technique that is recommended by SAP
- D. Because you automatically add changed objects to the transport request

Correct Answer: AC

QUESTION 2

Which recent software innovations are applied in SAP HANA? 3 answers

- A. Columnar data storage
- B. Automated de-installation at system shutdown
- C. Improved data compression algorithms
- D. Insert Only approach
- E. Random Undefined Multi-Memory Swapping (RUMMS)

Correct Answer: ACD

QUESTION 3

You perform a static code check using the Code Inspector (SCI). In your SCI variant, you select the Search problematic SELECT * statement check. What does this check report? Please choose the correct answer.

- A. SELECT * statements where fewer than a specified percentage of all fields are effectively used
- B. SELECT * statements on tables with more than a specified number of fields
- C. SELECT * statements on tables with more than 100,000 records
- D. SELECT * statements on tables with the Column Store storage type

Correct Answer: A

QUESTION 4

How many result sets are returned when an SAP HANA database procedure is called using the CALL WITH OVERVIEW statement?

Please choose the correct answer.

- A. As many result sets as there are input parameters in the procedure
- B. Two result sets
- C. One result set
- D. As many result sets as there are table output parameters in the procedure

Correct Answer: C

QUESTION 5
