QUESTION 1

What are the main options to generate predictions based on SAP BW/4HANA data?

Note: There are 2 correct answers to this question.

- A. Generate predictions accidentally.
- B. Generate predictions in real time.
- C. Generate predictions on a regular basis.
- D. Generate predictions randomly.

Correct Answer: BC

QUESTION 2

Which two steps do you need to perform to make a display attribute available as a navigation attribute in a query?

- A. Drag and drop the display attribute to the Free section or the BW Query Designer.
- B. Activate the navigation attribute in the characteristic properties in BW Query Designer.
- C. Activate the navigation attribute in the respective InfoProvider.
- D. Activate the navigation attribute in the SAP BW data flow transformation.
- E. Change the attribute type from Display to Navigation in the InfoObject maintenance.

Correct Answer: AE

QUESTION 3

Is it possible to extend SAP HANA EIM with custom adapters?

- A. Yes, SAP HANA smart data integration offers an adapter API.
- B. No, this is not necessary because all existing sources can already be accessed via SAP HANA EIM.
- C. No, custom code is a potential security risk and therefore not allowed.
- D. Yes, you can use enhancement spots via the ODP framework to extend SAP ERP extractors.

Correct Answer: A

QUESTION 4

What is used to develop BW queries in SAP BW/4HANA?

- A. BEx Query Designer
- B. Eclipse-based Query Designer
- C. SAP Analysis for Microsoft Office
- D. BEx Web Application Designer

Correct Answer: B

QUESTION 5
