QUESTION 1

What is the aim of a unit test?

- A. to demonstrate that a unit meets the functional specifications
- B. to demonstrate that a unit meets the technical specifications
- C. to demonstrate that a unit integrates properly with other units

Correct Answer: B

QUESTION 2

What strongly benefits the quality characteristic 'testability'?

- A. the ease of operation of the system by the end-users
- B. the ease with which an interface can be created with another information system
- C. the ease with which the information system can be placed and maintained in an operational condition
- D. having a regression test and other testware

Correct Answer: D

QUESTION 3

Drivers can be used in the Execution phase of a test process. What are drivers for?

- A. to test, at an early stage, a module that has relationships with modules not yet realized
- B. to gain insight into aspects like memory use, CPU use, network load and performance
- C. to determine whether the system continues to function correctly and at the required speeds under the expected production load

Correct Answer: A

QUESTION 4

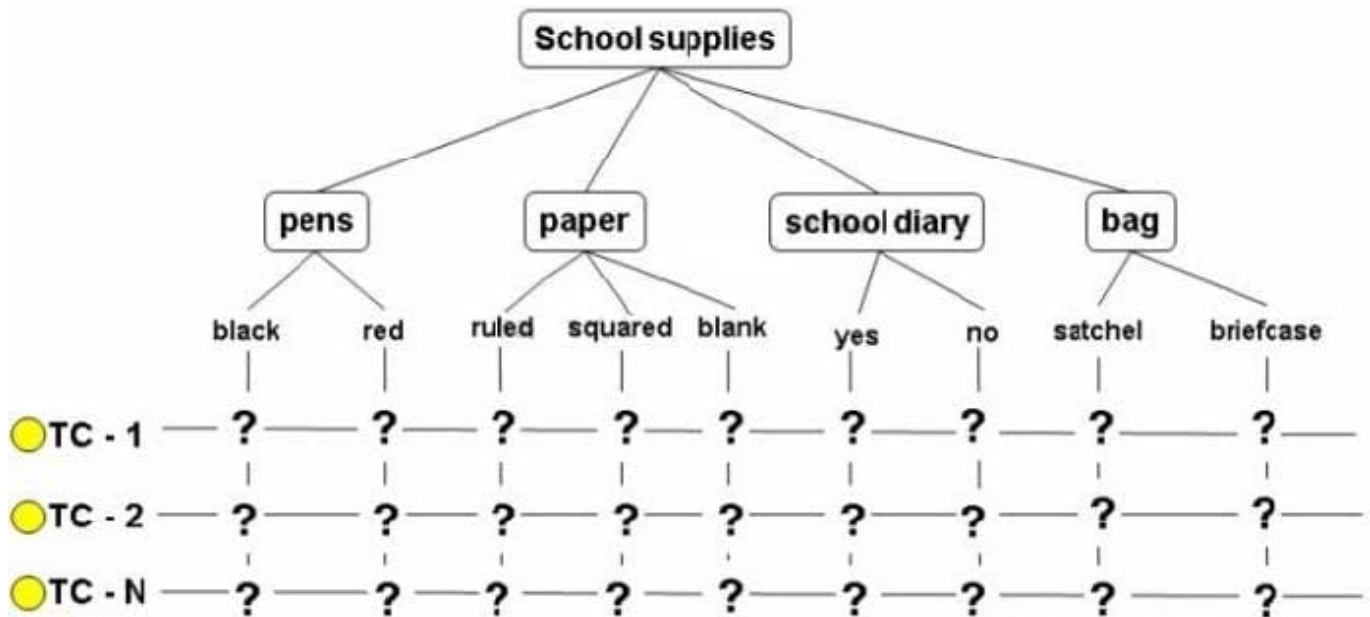

See the diagram below:

In order to test the purchase of school supplies, logical test cases must be created based on the data combination test. It has been agreed in this instance that a medium depth test is required. This means that all data must be subjected to pairwise testing:

Pens - paper - school diary - bag

The test cases are designed using the below classification tree.

What is the minimum number of test cases that will be generated by applying the pairwise testing technique? (What is "N" at a minimum?)

- A. 6
- B. 8
- C. 12
- D. 24

Correct Answer: A

QUESTION 5

See the definition below:

Tests in which the supplying party demonstrates that the product particularly meets the functional and non-functional specifications and the technical design, among other things of which test level is this the definition?

- A. acceptance test
- B. development test
- C. system test

Correct Answer: C
