QUESTION 1

Observe the details of the following dynamic inventory file. $ ls -l dynamic.py -rw-rw-r--. 1 user user 1928 Mar 30 08:21 dynamic.py Why will this inventory file cause the ansible command to fail?

A. Ansible cannot use python scripts as inventories.

B. The ansible user must own the file.

C. The file is not executable.

D. The ansible command will not fail using the noted file with the given details.

Correct Answer: C

Without being executable. Ansible will attempt to parse the script as a static inventory and fail.

QUESTION 2

What does the when keyword do?

A. There is no when keyword

B. Allows a task to be conditional

C. Allows a play to be conditional

D. Allows a play to be scheduled

Correct Answer: B

QUESTION 3

Why is it important to create a namespace for role variables?

A. Roles only have access to variables in their own namespace.

B. It is not really important.

C. Ansible requires namespaces to be set for a role and will error without them.

D. Namespacing role variables helps avoid conflicts with variables defined outside of the role.

Correct Answer: D

Because roles share variables and because plays can have variables defined outside of the role, namespacing role variables ensures that you are getting the variable you expect to get.

QUESTION 4

What formats may variables specified on the command line use when not using a file with the -e flag? (Choose all that apply.)

A. YAML

B. CSV

C. Ansible dictionary

D. JSON

Correct Answer: AD

Variables must be specified in JSON format when passed via command line.

QUESTION 5

SIMULATION

Using the Simulation Program, perform the following tasks:

Ad-Hoc Ansible Commands (Number Two) Task:

1.

 Use the ad-hoc command to make sure php is installed.

2.

 Use the ad-hoc command to make sure that php is installed and is the latest version.

3.

 Use the ad-hoc command to make sure that httpd is installed.

4.

 Use the ad-hoc command to remove httpd from the servers.

A.

Correct Answer: See explanation below.
