QUESTION 1

Where can you find documentation on Ansible modules? (Choose all that apply.)

A. The Ansible-Module man page.

B. The Ansible man page.

C. Using the ansible-doc command.

D. Ansible online documentation.

Correct Answer: CD

The ansible-doc command is designed to provide module documentation. Module documentation may be found online.

QUESTION 2

By default, how many times can a role be applied during a play?

A. Once, no matter the parameters provided.

B. As many times as necessary, no matter the parameters.

C. Once, presuming it is only applied with a single set of parameters.

D. As many times as necessary, presuming the `single_run\\' attribute is set to false.

Correct Answer: C

A role given only a single set of parameters will only be applied by Ansible one time in a play.

QUESTION 3

What is wrong with the following command: ansible all -a "mkdir/tmp/testfile"

A. There is not a module specified.

B. There is not an inventory file specified.

C. The command will execute without error.

D. The -b flag is required.

Correct Answer: C

This command will execute using the command module by default.

QUESTION 4

What values will serial accept? (Choose all that apply.)

A. A mix of integer and appropriately specified percentage values

B. Symbolic percentage values (as in 50%)

C. Decimal percentage values (as in .50)

D. Integer values

Correct Answer: ABD

As long as the percentage values are in the correct format (symbolic), serial can handle mixing and matching the values. Serial will take integer values.

QUESTION 5

How are facts collected? (Choose all that apply.)

A. During playbook execution.

B. Ansible agents push facts to the control node.

C. The Ansible control node periodically polls the hosts in the inventory.

D. The setup module.

Correct Answer: AD

The setup module collects facts.
