QUESTION 1

Cloud Kicks (CK) wants to use its existing single sign-on (SSO) Identity Provider with its new Experience Cloud site.
CKwants to use the Just-in-Time Provisioning feature for Experience Cloud.

Which value is required in the user type?

A. Standard

B. Username

C. Entity ID

D. Federation ID

Correct Answer: D

This value is used to map the user\\'s identity from the externalidentity provider to the user record in Salesforce. The
Federation ID must be unique for each user and must match the value of the SAML attribute that is sent by the identity
provider during the SSO process. The Federation ID can also be used for JIT provisioning, which creates or updates
users on the fly when they log in to the site.

QUESTION 2

Ursa Major Solar would like content from Salesforce CMS to be queried when users search for keywords in its customer
portal.

Which setting must be turned on in order for Global Search .n Experience Builder to query content m Salesforce CMS?

A. Community must be activated.

B. Sharing Rules must be set to Read/Write.

C. Search must be enabled for the selected CMS Channel.

D. Gather Customer Insights Data must be selected.

Correct Answer: C

This setting allows the CMS content to be searchable within the channel where it is published. To enable search for a
channel, open the CMS Channels tab in Salesforce CMS, select Edit beside a channel, and click the Search toggle.
Additionally, if the site is created with Experience Builder, the Global Search Box component must be configured to
include the Content object4

QUESTION 3

Universal Containers is implementing a Partner Community.

Which sharing setting would allow users to collaborate with their peers who work for the same partner firm, butnot with
any users outside of their firm?

3 / 5

A. Community User Visibility

B. Chatter Group Member Visibility

C. Site User Visibility

D. Portal User Visibility

Correct Answer: D

The sharing setting that would allow users to collaborate with their peers who work for the same partner firm, but not with any users outside of their firm, is Portal User Visibility. Portal User Visibility is a setting that allows portal users (such as Customer Community or Partner Community users) to see other portal users who have the same role or a role below them in the portal role hierarchy. This setting enables portal users to share information and collaborate with their peers within their own firm, but not with other firms.

QUESTION 4

As a pilot. Ursa Major Solar\'s customers from California wore assigned to a page variation for the Home page so that the layout looks slightly different than for customers from other states. The page variation uses a Rich Content Editor componentassigned solely to Platinum customers.

Who will be able to view the Rich Content Editor component?

A. All Platinum customers

B. All customers from California

C. All customers

D. All Platinum customers from California

Correct Answer: D

The RichContent Editor component will be visible to all Platinum customers from California. This is because UMS has assigned the component solely to Platinum customers using Audience Targeting, which is a feature that allows UMS to display different content to different audiences based on criteria such as profile, location, domain, or user. UMS has also assigned the page variation for the Home page to customers from California using Page Variations, which is a feature that allows UMS to create different versions ofa page and assign them to different audiences based on criteria such as record type, field value, or ownership.

QUESTION 5

Get Cloudy Consulting wants to leverage Experience Bundle for making updates to its community.

What are the two key features of experienceBundle?

Choose 2 answers

A. ExperinceBundle allows us to programmatically edit any community but using Experience Builder.

B. ExperienceBundle enables Creating experiencingacross orgs.

C. ExperimentBundle provides editable community metadata in a human-readable format.

D. ExperienceBundle provides editable community metadata in a human-readable format.

Correct Answer: BD

ExperienceBundle is a feature that allows you toretrieve, deploy, create, update, or delete an Experience Cloud site\'s metadata definition in a single API call. Some of the key features of ExperienceBundle are:

ExperienceBundle enables creating experiences across orgs. You can use ExperienceBundle tomove your site\'s metadata from one org to another, such as from sandbox to production.

ExperienceBundle provides editable community metadata in a human-readable format. You can use ExperienceBundle to edit your site\'s metadata in JSON or XML format, whichmakes it easier to understand and modify.
