- A. PS/2
- B. VGA
- C. DVI
- D. USB
- E. FireWire
- F. Serial
- G. RJ-11
- H. Parallel

Correct Answer: DEFH

QUESTION 3

Which of the following types of attacks entices a user to disclose personal information such as social security number, bank account details, or credit card number?

- A. Password guessing attack
- B. Spoofing
- C. Phishing

D. Replay attack

Correct Answer: C

Phishing is a type of scam that entice a user to disclose personal information such as social security number, bank account details, or credit card number. An example of phishing attack is a fraudulent e-mail that appears to come from a user's bank asking to change his online banking password. When the user clicks the link available on the e-mail, it directs him to a phishing site which replicates the original bank site. The phishing site lures the user to provide his personal information. Answer option B is incorrect. Spoofing is a technique that makes a transmission appear to have come from an authentic source by forging the IP address, email address, caller ID, etc. In IP spoofing, a hacker modifies packet headers by using someone else's IP address to his identity. However, spoofing cannot be used while surfing the Internet, chatting on-line, etc. because forging the source IP address causes the responses to be misdirected. Answer option D is incorrect. Replay attack is a type of attack in which attackers capture packets containing passwords or digital signatures whenever packets pass between two hosts on a network. In an attempt to obtain an authenticated connection, the attackers then resend the captured packet to the system. Answer option A is incorrect. A password guessing attack occurs when an unauthorized user tries to log on repeatedly to a computer or network by guessing usernames and passwords. Many password guessing programs that attempt to break passwords are available on the Internet. Following are the types of password guessing attacks: Brute force attack Dictionary attack Reference: "<http://en.wikipedia.org/wiki/Phishing>"

QUESTION 4

A technician wants to keep a router up to date.

Which of the following **MUST** be updated regularly?

- A. SSID
- B. Administrator password
- C. Wireless encryption
- D. Firmware

Correct Answer: D

QUESTION 5

Which type of memory chip has 168 pins?

- A. DMA
- B. DIMM
- C. DIP
- D. SIMM

Correct Answer: B

The Dual inline memory module (DIMM) has 168 pins. 168-pin Dual inline memory module (DIMM)

Answer option D is incorrect. The Single inline memory module (SIMM) has 72 pins.

72-pin Single inline memory module (SIMM)
