QUESTION 1

Which of the following encryption types would BEST be used to protect data on a shared computer?

A. File

B. VPN

C. Email

D. Mobile

Correct Answer: A

QUESTION 2

The marketing department contacts the web development team and states that they are receiving inconsistent values in a newly launched form. Which of the following is MOST likely the problem?

A. Private browsing is being used by some clients visiting the site.

B. Client-side scripting has been deactivated on some clients visiting the site.

C. Legacy browsers that do not support scripting are being used by some clients.

D. Server-side scripting has been deactivated by the server administrator.

Correct Answer: B

B. Client-side scripting has been deactivated on some clients visiting the site.

Since this is a form, we need the clients to take it. If something isn\\\'t working on their end, there could be some loose information that we receive.

QUESTION 3

Which of the following is the number of bytes that is in 2KB?

A. 1024

B. 2048

C. 20000

D. 1048576

Correct Answer: B

QUESTION 4

Given the following pseudocode:

```
program Breakfast
weekday = ["Monday", "Tuesday", "Wednesday", "Thursday", "Friday"]
weekend = ["Saturday", "Sunday"]
   if today == Wednesday
      output "Bacon and eggs"
   else if today == Firday
      output "Oatmeal"
   else if today in weekend
      output "Waffles"
   else
      output "Pancakes"
end
```

If the Breakfast program ran on Sunday, which of the following would be the output?

A. Oatmeal

B. Bacon and eggs

C. Waffles

D. Pancakes

Correct Answer: C

QUESTION 5

Which of the following is both an input and output device?

A. Microphone

B. Speaker

C. Touch-screen monitor

D. Keyboard

Correct Answer: C

Audio engineer here while you can technically output a signal to a microphone and hear audio from it... (I don\'t recommend you try this for yourself as you might accidentally destroy your mic unless you have a really cheap mic you\'re willing to sacrifice) ...That is not the intention of a microphone. Not to mention the fact that you can\'t both input and output a signal from it at the same time. A microphone is clearly intended to be used as a input-only device. However a touchscreen both is capable of inputs and outputs at the same time where as a microphone isn\'t.
