**QUESTION 1**

Bubba buys "double-barreled" municipal bonds. What is the source of guaranteed repayment on these bonds?

- A. a specific municipal project plus a federal subsidy
- B. two specific municipal projects
- C. all projects of the issuing municipality
- D. one specific municipal project plus the full financial strength of the issuer

Correct Answer: D

one specific municipal project plus the full financial strength of the issuer. Double -barreled bonds are first payable from a specific project, but are further guaranteed by the issuing municipality.

---

**QUESTION 2**

Bubba is buying a Federal Home Loan Bank issue that is offered at 95.22. How much will he pay to purchase one bond?

- A. \$95.22
- B. \$951.63
- C. \$952.20
- D. \$956.88

Correct Answer: D

\$956.88. The price of 95.22 means 95 and 22 / 32. One thirty-second of a \$1,000 bond with a par of 100.00 is \$0.3125. Twenty-two thirty-seconds is therefore about \$6.88. The 95 is the percentage of one bond with a par value of \$1,000. Multiplying 95% by \$1,000 equals \$950. Adding \$6.88 plus \$950 equals \$956.88.

---

**QUESTION 3**

FINRA advertising standards permit a dealer to state that a CMO has an implied AAA rating if the securities are issued:

- A. with an average life no longer than ten years
- B. by a US government agency
- C. by a private issuer who has not yet received an expected AAA rating
- D. in amounts less than \$1,000,000

Correct Answer: B

by a US government agency. Since government agencies do not apply for ratings, it is permissible to state that its

issues have an "implied AAA rating". Private issuers must receive a rating in order to state it in advertising.

---

#### QUESTION 4

Under which of the following was SIPC established?

- A. Securities Act of 1933
- B. Securities Exchange Act of 1934
- C. Securities Investor Protection Act of 1970
- D. Securities Exchange Reform Act of 1975

Correct Answer: C

Securities Investor Protection Act of 1970. SIPC was established under this act.

---

#### QUESTION 5

Which of the following is least relevant in evaluating the safety of a general obligation bond?

- A. per capital debt
- B. total GO debt as a percentage of market value of property
- C. total GO debt as a percentage of assessed value of property
- D. total debt service as a percentage of net operating revenue

Correct Answer: D

total debt service as a percentage of net operating revenue. This ratio is applicable to revenue bonds but not general obligation bonds. The other choices are all used in measuring credit risk in a GO bond.
