QUESTION 1

A hosted FileMaker Pro 11 file contains a text field called ColorChoice that uses global storage. User A and User B are using the file. User A runs a script that changes the value in the ColorChoice field.

User A logs off and User B continues working. User B runs a script that modifies the ColorChoice field after User A has logged off.

If there is no other activity in the database, when User A logs back in, which value will User A see in the

ColorChoice field?

A. No value: the field will be empty.

B. The last value that User A\\'s script entered into the field.

C. The last value that User B\\'s script entered into the field.

D. The last value that was saved in a session that was running on the file\\'s host.

Correct Answer: D

QUESTION 2

For which two actions will FileMaker Pro 11 NOT preserve Sort Order for records being browsed, by reordering or resorting the found set following the action? (Choose two.)

A. selecting the Records > Show Omitted Only menu item

B. adding records to the table using File > Import Records > File...

C. modifications to a field\\'s data caused by choosing Relookup Field Contents for a field used to specify the current sort order

D. modifications to schema for instance redefining a field type from Number to Text when that field is used to specify the current sort order

E. in Browse mode, rightclick a field that is used as a a field used to specify the current sort order and choose the Extend Found Set popup menu item to add some matching records to the found set

Correct Answer: AB

QUESTION 3

An Instant Web Publishing (IWP) user runs a script containing script steps that are NOT

webcompatible. When the script reaches the first incompatible step, what will occur?

A. The script will always stop executing, with no feedback to the user.

B. The script will always skip the incompatible script step and continue executing.

C. The script will tell the user that a incompatible step has been encountered and prompt the user to Stop or Continue.

D. The script will skip the incompatible script step and continue executing only if Allow User Abort is set to [Off] in the script.

Correct Answer: D

QUESTION 4

A script executed by a FileMaker Server schedule running on a Windows server exports a group of records to a tabdelimited file. The resulting file needs to be saved to the FileMaker Server Documents folder and the filename must contain a current timestamp appended to the word "orders_" (e.g. "orders__01252010065656.tab").

Which two statements are true? (Choose two.)

A. Assuming a default installation of FileMaker Server, the resulting file will be located at:

B. \Users\Administrator\Documents.

C. Assuming a default installation of FileMaker Server, the resulting file will be located at:

D. \Program Files\FileMaker\FileMaker Server\Data\Documents.

E. When specifying the output file, use a file path that references a variable with the following value: "filewin:" and Get (DocumentsPath) and "orders_" and Filter (Get (CurrentTimeStamp) "0123456789") and ".tab".

F. When specifying the output file, use a file path that references a calculation field with the following value: "filewin:" and Get (DocumentsPath) and "orders_" and Filter (Get (CurrentTimeStamp) "0123456789") and ".tab".

G. When specifying the output file, use a file path that references a variable with the following value: "filewin:" and Get (ServerDocumentsPath) and "orders_" and Filter (Get (CurrentServerTimeStamp) "0123456789") and ".tab".

Correct Answer: BC

QUESTION 5

For which two is it possible to specify conditional formatting? (Choose two.)

A. a Web Viewer

B. a merge variable

C. a layout\\'s body part

D. the title of a chart object.

E. an inserted graphic formatted as a button

F. a rectangle object being used as a graphical background

Correct Answer: AB
