QUESTION 1

In FileMaker Pro 11 Advanced, which two statements are true about the Data Viewer and Script Debugger? (Choose two.)

A. The Current tab of the Data Viewer can be used to modify the value of a variable.

B. The Script Debugger will be invoked when a script is run from a button, but not from a Custom Menu.

C. The Watch tab of the Data Viewer can be used to create global variables when the user has [Full Access] privileges in a file.

D. The Current tab of the Data Viewer can be used to modify the value of a field with global storage while a script is paused in the Script Debugger.

Correct Answer: AC

QUESTION 2

A FileMaker Pro 11 file has a Customer table and a related Contact table. The relationship from Customer to Contact is configured to create related records in the Contact table. On the Relationships Graph, an external table occurrence called Invoice is referenced and is related to the Customer table. The file has layouts based on the Customer, Contact, and Invoice table occurrences.

The following script is used:

Script A:

New Record/Request

A button that performs Script A has been placed on the Customer layout in a portal that displays the

related Contact records.

Which two statements are true? (Choose two.)

A. When the button is clicked, a new record is created in the Contact table.

B. When the button is clicked, a new record is created in the Customer table.

C. If the user is on the Contact layout and runs Script A from the Scripts menu, a new record will be created in the Contact table.

D. If the user is on the Customer layout and runs Script A from the Scripts menu, a new record is created in the Customer table, and a new related record is created in the Contact table.

E. Without a Go to Layout script step, Script A cannot be run from the Scripts menu and create a new record in the Invoice table.

Correct Answer: BC
