**QUESTION 1**

Given a text field Full Name, AutoEnter by Calculated value has been selected in field options, using the following formula: name First and " " and Name Last

The developer then disables (unchecks) the option Do not replace existing value of field (if any). for which two cases will the results of the specified formula be inserted into the field Full Name? (Choose two.)

- A. when the record is first created
- B. when the field Full Name itself is modified
- C. only when the field Full Name was previously empty
- D. when either of the fields Name First or Name Last are modified
- E. when the field Full Name itself is modified and the record is committed

Correct Answer: AD

QUESTION 2

Consider two FileMaker files, Collection and Item, where tables from Item are included in the Relationships Graph of Collection. Which method will preserve all functionality in the Relationships Graph of Collection after renaming the Item file to Artifact?

- A. delete referenced Item table occurrences in the Relationships Graph for Collection and recreate them for Artifact
- B. click the Repair Reference button in the Relationships Graph for Collection and reset the file path
- C. choose File > Manage > External Data Sources... for Collection and reset the file path
- D. select referenced Item table occurrences in the Relationships Graph for Collection and rightclick to choose Rename File Source...
- E. choose the File > Recover... menu in FileMaker Pro 11 Advanced, select the Collection file, then choose Repair References under Advanced Recover Options

Correct Answer: C

QUESTION 3

A FileMaker Pro 11 database is hosted by FileMaker Server 11. User A and User B are accessing the database at the same time. User A runs a script that loops over a set of records and makes changes to those records. During the time that the script runs, User B is editing one of the records that is also in User A's found set and is being acted on by User A's script.

Which statement is true about this situation?

- A. User A's script will stop looping when it reaches the record User B is editing.

B. User A's script will make changes to all records in its found set except the record being edited by User

B.

C. User A's script will stop looping when it reaches the record User B is editing, and will wait to continue until User B releases the record.

D. When it reaches the record User B is editing, User A's script will stop if User A's script is running with Set Error Capture[On]. Otherwise User A will be prompted to either continue or cancel the running script.

Correct Answer: B

QUESTION 4

Which three conditions must be met to allow user access via accounts that are externally authenticated? (Choose three.)

A. The file must be hosted from FileMaker Server.

B. Account Group Name must match a Group Name specified in the external authentication directory service.

C. The associated privilege set must have the Extended Privilege Access via FileMaker Network (fmapp).

D. The associated privilege set must have the Extended Privilege Access via External Server Authentication (fmesa).

E. The Specify Directory Service Settings in the FileMaker Server Admin Console must be configured to include the LDAP Server Address, Port, and Search Base.

Correct Answer: ABC

QUESTION 5

Given a custom function created in FileMaker Pro 11 Advanced called Explode with a single parameter str defined as:

```
Case ( Length ( str ) > 1
```

```
Explode ( Left ( str Length ( str ) 1
```

```
) )
```

```
and "?" and
```

```
Left ( str Length ( str ) 1
```

```
)
```

```
str )
```

What is the result of Explode ("Bob")?

A. Bo B

B. B Bo

B

C. B B Bo

D. Bob B Bo

E. B Bo Bob

F. Bob Bo B

Correct Answer: C
