**QUESTION 1**

What type of Unified Modelling Language (UML) diagram is used to show dependencies between logical groupings in a system?

- A. Package diagram
- B. Deployment diagram
- C. Class diagram
- D. Use case diagram

Correct Answer: A

QUESTION 2

Allied services have recently purchased NAC devices to detect and prevent non-company owned devices from attaching to their internal wired and wireless network. Corporate devices will be automatically added to the approved device list by querying Active Directory for domain devices. Non-approved devices will be placed on a protected VLAN with no network access. The NAC also offers a web portal that can be integrated with Active Directory to allow for employee device registration which will not be utilized in this deployment. Which of the following recommendations would make NAC installation more secure?

- A. Enforce company configuration standards for personal mobile devices
- B. Configure Active Directory to push an updated inventory to the NAC daily
- C. Disable the web portal device registration service
- D. Change the wireless password following the NAC implementation

Correct Answer: C

QUESTION 3

What tool creates visual network topology output and results that can be analyzed by Ndiff to determine if a service or network asset has changed?

- A. Ngrep
- B. CIS-CAT
- C. Netscreen
- D. Zenmap

Correct Answer: D

**QUESTION 4**

Which of the following actions produced the output seen below?

```
C3PO:Documents student$ diff firewallrules.txt firewallrules2.txt
< access-list inbound permit tcp 8.8.0.0 0.0.0.255 10.10.12.252 eq 8080
---
> access-list inbound permit tcp 8.8.0.0 0.0.0.255 10.10.12.252 eq 8080
> access-list inbound permit tcp host 209.7.159.53 any 3389
```

- A. An access rule was removed from firewallrules.txt
- B. An access rule was added to firewallrules2.txt
- C. An access rule was added to firewallrules.txt
- D. An access rule was removed from firewallrules2.txt

Correct Answer: B

QUESTION 5

What could a security team use the command line tool Nmap for when implementing the Inventory and Control of Hardware Assets Control?

- A. Control which devices can connect to the network
- B. Passively identify new devices
- C. Inventory offline databases
- D. Actively identify new servers

Correct Answer: D
