**QUESTION 1**

You work as a Network Administrator for NetTech Inc. The company has a Windows Server 2008 domain- based network. The network contains Windows Server 2008 based two-node Network Load Balancing (NLB) cluster named

Info.nettech.com. The cluster is implemented for high availability and load balancing for the company's intranet Web site. You find that the users can see the Network Load Balancing (NLB) cluster on the network neighborhood. The users are

able to connect to various services by using the Info.nettech.com. The cluster is configured with the one port rule that equally balances all TCP/IP traffic across the cluster nodes. You want to configure the cluster to accept only HTTP traffic.

What will you do to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

- A. Create a new port rule to allow TCP port 110.
- B. Reconfigure the Network Load Balancing (NLB) cluster.
- C. Delete the default port rules by using Network Load Balancing cluster console.
- D. Create a new port rule to allow TCP port 80.

Correct Answer: CD

QUESTION 2
