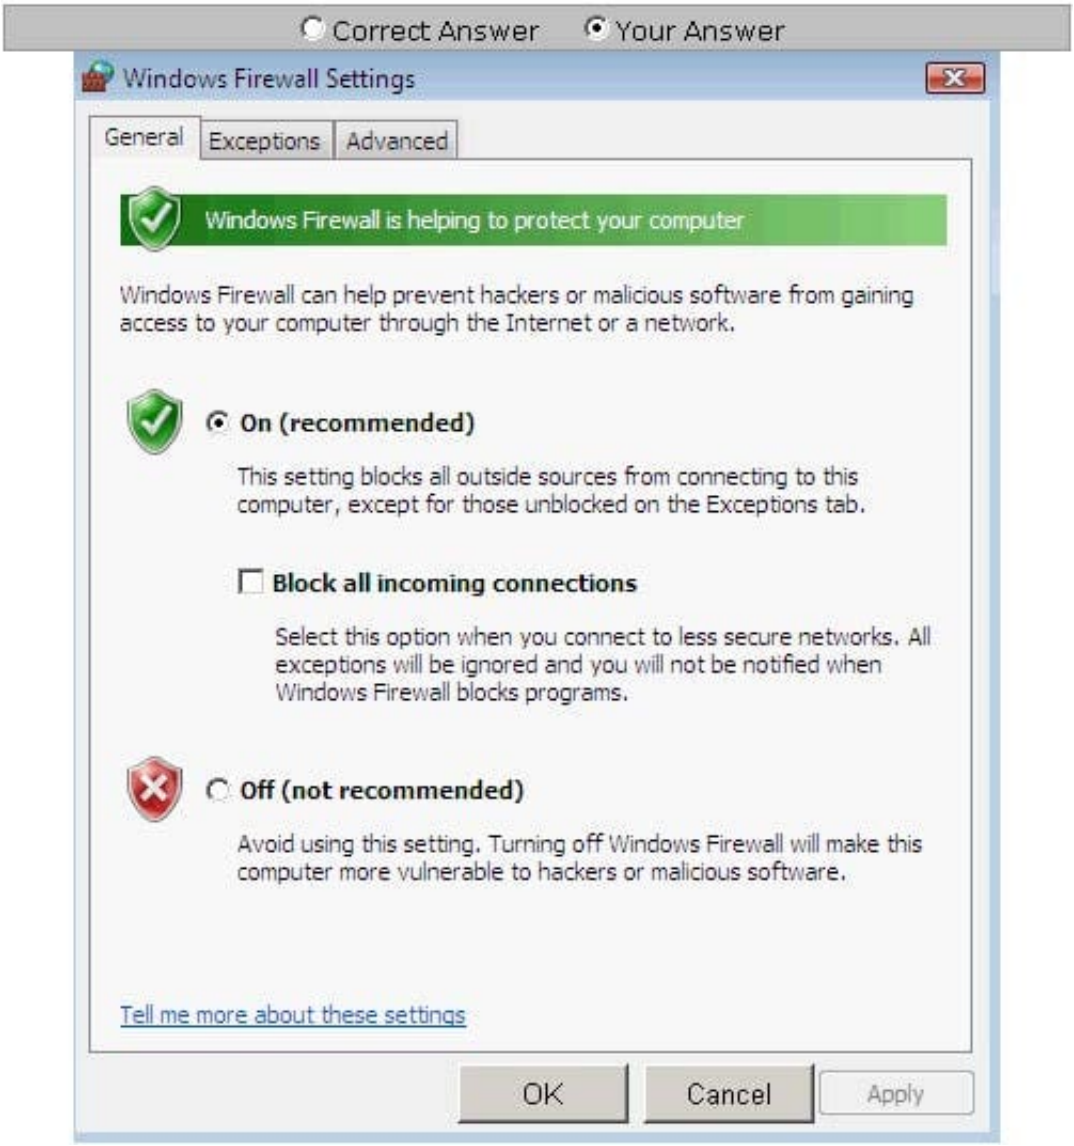
Correct Answer: B

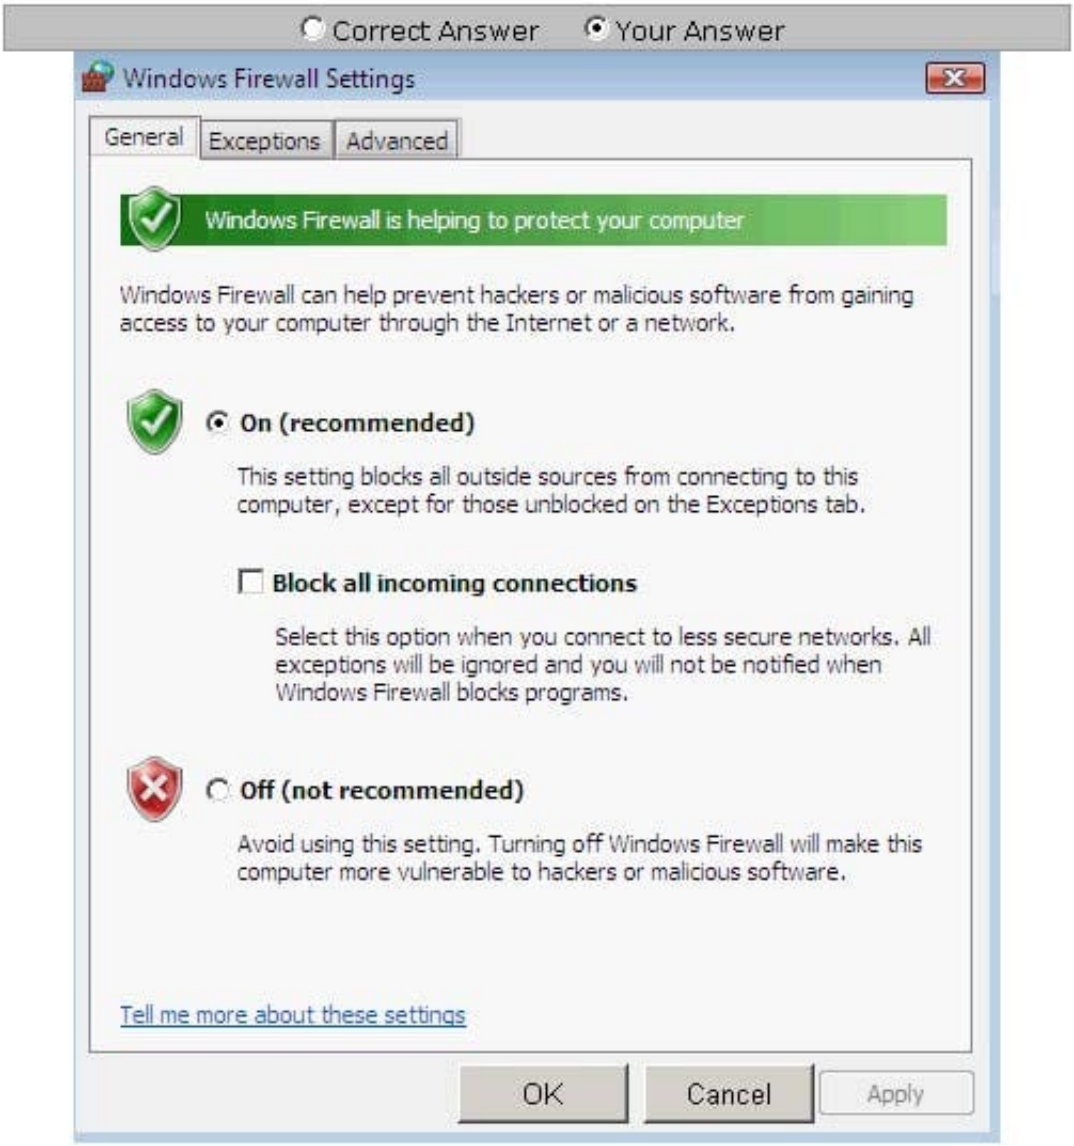
QUESTION 3

Steve works as a Network Administrator for Blue Tech Inc. All client computers in the company run the Windows Vista operating system. He often travels long distances on official duty. While traveling, he connects to the office server through his laptop by using remote desktop connection. He wants to run an application that is available on the server of the company. When he connects to the server, he gets a message that the connection is blocked by the firewall. He returns to his

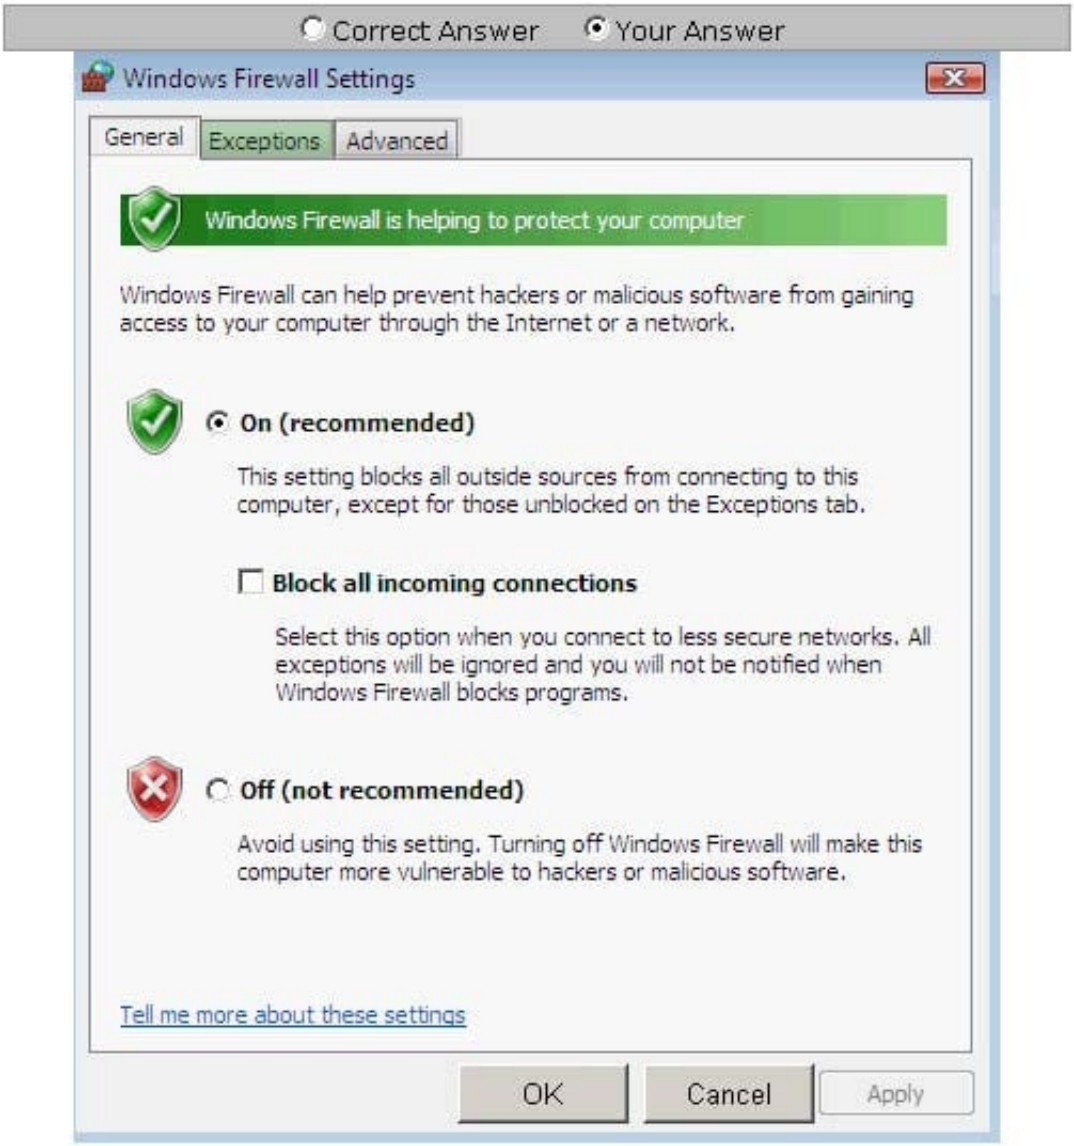


office to resolve the issue. He opens the Windows Firewall Settings dialog box. What actions should he perform in the dialog box given below to accomplish the task?

Hot Area:



Correct Answer:



Correct Answer
Your Answer
Windows Firewall Settings
General
Exceptions
Advanced
Windows Firewall is helping to protect your computer
Windows Firewall can help prevent hackers or malicious software from gaining access to your computer through the Internet or a network.
On (recommended)
This setting blocks all outside sources from connecting to this computer, except for those unblocked on the Exceptions tab.
Block all incoming connections
Select this option when you connect to less secure networks. All exceptions will be ignored and you will not be notified when Windows Firewall blocks programs.
Off (not recommended)
Avoid using this setting. Turning off Windows Firewall will make this computer more vulnerable to hackers or malicious software.

QUESTION 4

You are the project manager for your organization and are trying to determine which vendor your organization will use. You have determined that any vendor that would like to bid on your project work will need to have a Microsoft Certified System Engineer on staff, have eight years of Cisco experience, and have at least two references from similar projects. What have you created in this scenario?

A. Screening system for the vendors

B. Weighting system for the vendors

C. Preferred vendors list

D. Bidders conference

Correct Answer: A

QUESTION 5

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. John notices that the We-are-secure network is vulnerable to a man-inthe-middle attack since the key exchange process of the cryptographic algorithm it is using does not authenticate participants. Which of the following cryptographic algorithms is being used by the Weare-secure server?

A. RSA

B. Diffie-Hellman

C. Twofish

D. Blowfish

Correct Answer: B
