**QUESTION 1**

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2005 as its application development platform. You create a Windows service application that will be used by Visual Studio .NET applications. You want to ensure that an access to the Windows service is restricted. Therefore, you decide to use the ServiceInstaller class. You want to specify the security context of the Windows service application. Which

- A. Password property
- B. UserName property
- C. Context property
- D. Account property

Correct Answer: D

---

**QUESTION 2**

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2005 as its application development platform. You are creating an application using .NET Framework 2.0. The application has multiple threads that execute one after another. You want to ensure that the application terminates only when all the threads complete their tasks. Which of the following methods will you use to accomplish the task?

- A. Join
- B. Abort
- C. Sleep
- D. Suspend

Correct Answer: A

---

**QUESTION 3**

You work as a Software Developer for ABC Inc. You create a Console application to create multiple satellite assemblies. Which of the following statements about satellite assemblies are true?

Each correct answer represents a complete solution. Choose all that apply.

- A. They do not contain any executable code.
- B. They are used to deploy language-specific resources for an application.
- C. The Assembly Linker tool is used to compile .resources files into satellite assemblies.
- D. An application can have only one satellite assembly.

Correct Answer: ABC

---

**QUESTION 4**

Allen works as a Software Developer for ABC Inc. He develops an application using Visual Studio .NET

2005. The application will be used for the registration of employees by filling a form provided in the application. The form contains the following fields:

I First Name

I Last Name

I Date of Birth

I E-mail

He provides a TextBox control for each field. He wants an employee to be able to receive a user- defined error message when he makes a wrong entry. Which of the following properties is mandatory if a

CustomValidator control is used to validate an entry?

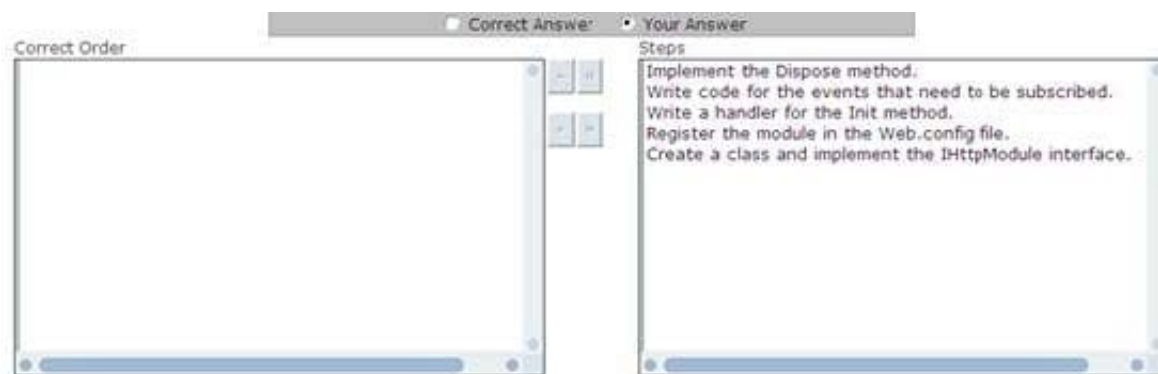

- A. EnableViewState
- B. EnableTheming
- C. ErrorMessage
- D. IsValid

Correct Answer: D

---

**QUESTION 5**

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2008 as its application development platform. You create an ASP.NET Web application using the .NET Framework 3.5. You want to use a HTTP module called on each and every request made by the application. It is called as part of the ASP.NET request pipeline. It has right to access life-cycle events throughout the request. You also want to ensure that the HTTP module allows a user to inspect incoming and outgoing requests and take appropriate action based on the request. What will be the correct order to create the HTTP module?

A.

Correct Answer: A
