Correct Answer: D

QUESTION 3

IPSG DHCP-snooping can be configured to statically bind or bind to a table.

A. True

B. False

Correct Answer: A

QUESTION 4

Which of the following statements regarding BGP route summarization is true?

A. Routes in the local BGP routing table can be manually aggregated.

B. After the aggregate ipv4-address mask command is configured, only summary routes are advertised and specific routes are not advertised.

C. By default, automatic BGP route summarization is enabled.

D. BGP supports manual aggregate and automatic summarization of IPv6 routes.

Correct Answer: C

QUESTION 5

Which of the following statements regarding a TCP sliding window are false?

A. The sender advertises the size of the initial window.

B. If the sender does not receive an acknowledgment message after the retransmission timer times out, it retransmits the unacknowledged data.

C. The sliding window size can only be increased or remains unchanged.

D. A TCP sliding window allows the sender to send multiple data packets before receiving an acknowledgment message.

E. The sender does not need to transmit packets with a complete window size.

Correct Answer: ABE
