**QUESTION 1**

As shown in the figure below. All hosts can communicate normally. Which of the following statements are correct? ()
(Multiple Choice Questions)

- A. G0/0/3 of SWB learned 2 mac addresses
- B. SWA's G0/0/3 learned 1 mac address
- C. SWA's G0/0/3 learned 2 mac addresses
- D. SWA's G0/0/3 learned 3 mac addresses

Correct Answer: AB

QUESTION 2

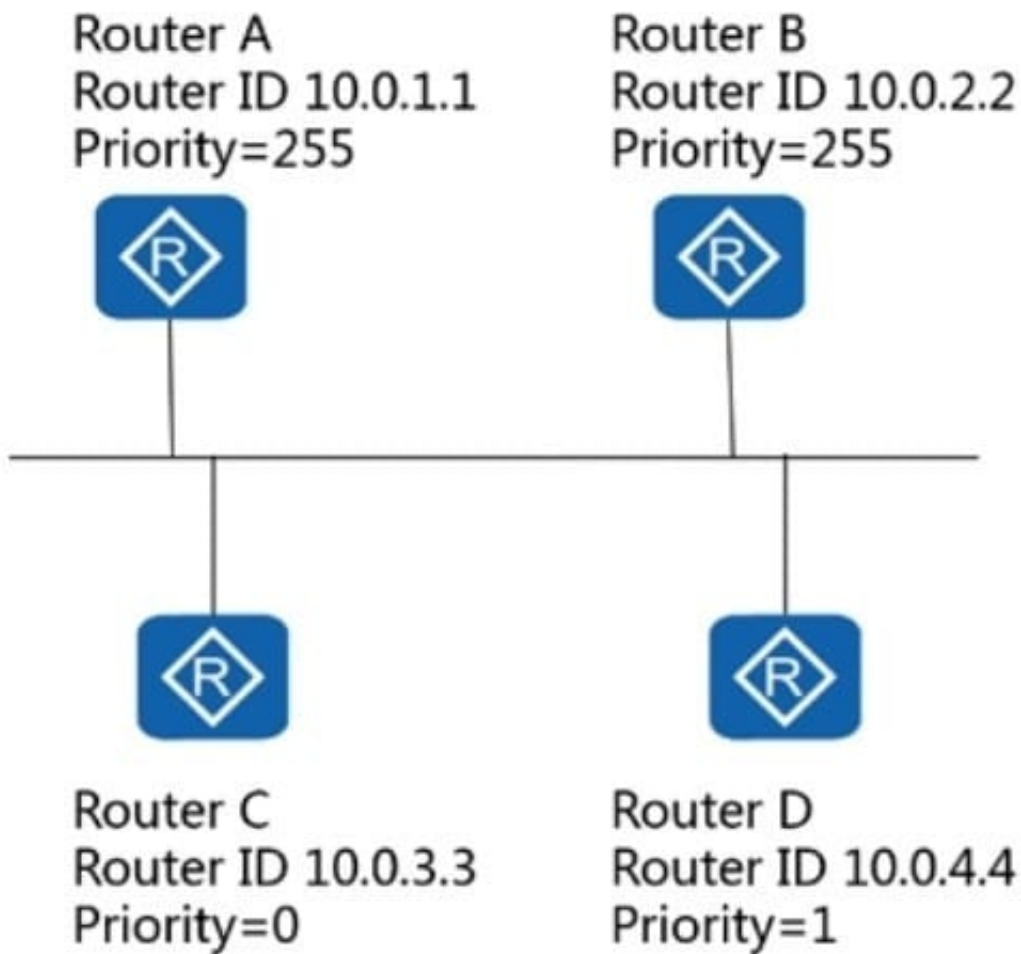

Which authorization modes are supported by AAA on Huawei ARG3 series routers? (*)

- A. Not authorized
- B. HWTACACS authorization
- C. Local authorization
- D. Authorization after successful RADIUS authentication

Correct Answer: ABCD

QUESTION 3

Assuming that OSPF has been enabled on all routers in the following figure, which router is the BDR on this network?

- A. Router A
- B. Router B
- C. Router C
- D. Router D

Correct Answer: A

The BDR (Backup Designated Router) is then elected based on the second highest OSPF priority or second highest Router ID if there is a tie in OSPF priority among remaining routers after DR election. So in this case, after Router A is elected as the DR, Router B would be elected as the BDR because it has the second highest OSPF priority and second highest Router ID among remaining routers.

QUESTION 4

When planning a campus network, which of the following methods can be used to divide service VLANs? ()

- A. VLAN by business
- B. Divide VLAN by logical area

C. Divide VLAN into J by geographical area

Correct Answer: B

QUESTION 5

Which of the following is not an open API of Huawei controllers?

A. RESTful

B. NETCONF

C. AAA

D. OpenFlow

Correct Answer: C

AAA (Authentication, Authorization and Accounting). AAA is not an open API of Huawei controllers. RESTful, NETCONF and OpenFlow are all open APIs supported by Huawei controllers.
