-  **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following statements about Huawei OceanStor Backup Solution is false?

- A. Compared with disaster recovery, backup provides a finer restoration granularity, such as taking files as the restoration level and offering multiple backup points in time.
- B. If source data and its backup data have the same format, a host can directly read and write the backup data;
- C. Backup software can back up data to tapes for offline archiving.

Correct Answer: B

QUESTION 2

Which of the following statements is incorrect about the scenario where one primary backup domain and multiple branch backup domains exist?

- A. Multiple branch backup domains are integrated into a primary backup domain, allowing you to centrally view operation reports of each backup domain in the primary backup domain.
- B. Each branch backup domain works independently. If a branch backup domain is disconnected from the primary backup domain, backup jobs of the branch backup domain are not affected.
- C. The primary backup domain periodically collects metadata of branch backup domains. When the branch backup domain restores connection with the primary backup domain, the metadata transmission automatically restores.
- D. After a remote client is registered with the primary backup domain as an unconfigured client, the client can be hidden and grouped.

Correct Answer: C

QUESTION 3

In Huawei OceanStor active-active disaster recovery solution, which of the following links can be used between data centers? (Multiple Choice)

- A. GE-WAN links
- B. Fibre Channel links
- C. 10GE links
- D. Private GE links

Correct Answer: BC

QUESTION 4

Which of the following statements about media deduplication is false?

- A. Data blocks are transmitted from the source end to the target end and then deduplicated at the target end.
- B. Media deduplication does not consume resources at the source end.
- C. Media deduplication is equivalent to post-processing deduplication.
- D. Media deduplication does not save the transmission bandwidth.

Correct Answer: C

QUESTION 5

Which of the following statements are correct?

1.

Backup can prevent misoperations and system issues.

2.

DR can prevent production data loss in catastrophic data center failures.

- A. Statement 1 is false. Statement 2 is true.
- B. Statement 1 is false. Statement 2 is false.
- C. Statement 1 is true. Statement 2 is true.
- D. Statement 1 is true. Statement 2 is false.

Correct Answer: C
