**QUESTION 1**

Single choice, the underlying virtualization of the N8000 cluster NAS system is realized through the VxVM component. The virtual objects managed by VxVM are: VM Disk, Disk Group, Subdisk, Pick, which one of the following explanations is correct?

- A. N8000 cluster file system VxM is a non-journal file system that can support files above 2T
- B. File system snapshots use copy-on-write (copy-on-write technology), and share partition or volume storage with other file sets space The snapshot provided by
- C. N8000 is based on the file system level the snapshot provided by the
- D. document N8000 is based on the file system level checkpoint

Correct Answer: A

QUESTION 2

Among the following backup media, the ones that support data deduplication are: (multiple choice)

- A. S2600 V3
- B. N8500
- C. OceanStor6800 V3
- D. FusionStorage

Correct Answer: AC

QUESTION 3

OceanStor900 uses general-purpose x86 architecture hardware to deploy Scale-out NAS system.

The realization of high concurrency and high performance is mainly based on three types of networking: IB, 10GE and PCIE. Among them, the network performance of PCIE Better and easier to expand and manage.

- A. True
- B. False

Correct Answer: A

QUESTION 4

The value of Huawei Oceanstor 9000infoTier is reflected in: (multiple choice)

- A. can ensure the system's response speed to hot data access and improve the storage performance of the entire system
- B. Take full advantage of the cost advantages of different storage media to effectively reduce deployment and maintenance costs
- C. Improve system storage performance and realize intelligent data management
- D. Realize automatic file migration according to the corresponding relationship between file attributes and different storage devices, reducing the cost and complexity of manual management

Correct Answer: ABCD

QUESTION 5

To access the object storage service (compatible with the OpenStack Swift interface), which of the following types of servers must be authenticated by the user.

- A. KEYSTONE
- B. LDAP
- C. RBAC
- D. AD

Correct Answer: A
