**QUESTION 1**

In an active-active disaster recovery solution configured with inter-site FC switch connection. When the distance between sides exceeds _____ km, you need to configure long-distance transmission.

- A. 1KM
- B. 10KM
- C. 25KM
- D. 50KM

Correct Answer: B

QUESTION 2

Some OceanStor V3 storage resources are mapped to a host as raw devices. The host then creates dedicated file systems on these raw devices. A test tool is used to create a large number of 13 KB files in the file systems. The test tool is also used to read those files randomly for testing the response. In this circumstance, changing the prefetch policy of the tested LUN to constant prefetch and setting the prefetch length to 16 KB can increase the system performance.

- A. True
- B. False

Correct Answer: A

QUESTION 3

In a Redhat Linux Enterprise 6 system, how do you safely uninstall the kernel driver?

- A. use `rmmod + driver name`, remove directly
- B. Directly uninstall the driver rpm package
- C. kill directly kill the drive process
- D. use `modprobe-r + driver name`, remove directly

Correct Answer: D

QUESTION 4

Which of the following is the wrong mode of operation when checking on a problem with the VMFS datastore for ESXi5.5 using the VMware ondisk metadata analyzer (VOMA)? (Assume the LUN NAA ID is `naa.60022a110009a8a800042e1800000000: 1`).

- A. Turn off the power of all running virtual machines or migrate these virtual machines to another data store

B. Use the esxcli storage vmfs extent list command to obtain the name and partition of the vmfs data store to be backed up after the provision of number of the supported devices.

C. voma -m vmfs -f check -d /vmfs/devices/disks/naa.60022a110009a8a800042e1800000000:1

D. voma -m vmfs -f check -d naa.60022a110009a8a800042e1800000000: 1

Correct Answer: D

QUESTION 5

Customers plan to use the intelligent partition feature of the OceanStor 18800 to implement LUN isolation and ensure the cache capacity of some special LUNs Volume. To do this, you must create smart partition meeting which of the following prerequisites? (Multiple choice)

A. All controller nodes are in normal state

B. The number of partitions created has not reached the limit

C. Engine remaining cache of not less than 256M

D. Create a partition read and write cache the same size

Correct Answer: ABC
