**QUESTION 1**

When a ticketing website conducts a big promotion, due to the huge amount of instantaneous visits, the website is easily paralyzed. In order to cope with traffic peaks, which of the following microservice governance methods can effectively deal with this scenario and prevent system overload and crash? ()

A. Current limit

Correct Answer: A

QUESTION 2

When a ticketing website conducts a big promotion, due to the huge amount of instantaneous visits, the website is easily paralyzed. In order to cope with traffic peaks, which of the following microservice governance methods can effectively deal with this scenario and prevent system overload and crash? ()

A. Current limit

Correct Answer: A

QUESTION 3

What benefits can a microservices architecture bring? () [Multiple choice questions]

A. The boundaries of service modules are clearer: microservices emphasize modular structure (REST interface calls). This is very important for large teams Yes.

B. Support for independent deployment: simple services are easier to deploy. Since the services are autonomous, there will be no systemcrash after a problem occurs.

C. Simple operation and maintenance: stateless, self-service operation and maintenance make the system no mature operation and maintenance team (mechanism). It greatly saves costs.

D. Allowing technological diversity: With microservices. You can mix multiple programming languages, development frameworks, and data storage technologies.

Correct Answer: ABD

QUESTION 4

What value can the Huawei Cloud CCE Cloud Container Engine bring to game manufacturers using CCE? [Multiple choice]

A. One-stop deployment and operation and maintenance

B. High-availability business is not interrupted

C. Flexible elastic scaling strategy

D. Customizable DevOps capabilities

Correct Answer: ABCD

QUESTION 5

In the IOT industry. The amount of data transmitted by the device is very small and usually has a fixed time interval. In this case, the CPU utilization is very low. Which solution can Huawei Cloud PaaS be used to save costs?

() [Multiple choice questions]

A. Serverless functional computing platform

B. Apply microservices scheme

C. Capability Open API Gateway

D. Apply SaaS transformation plan

Correct Answer: A
