**QUESTION 1**

The nurse manager has just prepared a medication for a patient and she asked you to give the medication. Which of the following is the best response to the nurse manager's request?

- A. Give the patient his medication and record it on the chart
- B. Ask another nursing colleague to give and record the medication
- C. Explain that you cannot give a medication that you did not prepare
- D. Give the medication and ask the nurse manager to record it on the chart

Correct Answer: C

QUESTION 2

A patient is to receive 50mL of fluid in 1/2 hour (30 min). The infusion pump should be set to deliver how many milliliters per hour?

- A. 25 ml/hr
- B. 50 ml/hr
- C. 75 ml/hr
- D. 100 ml/hr

Correct Answer: D

QUESTION 3

A patient is to receive 2.5mg of morphine sulfate. The ampoule contains 1000mcg/mL. How much morphine should the nurse administer?

- A. 0.25 ml
- B. 1 ml
- C. 1.5 ml
- D. 2.5 ml

Correct Answer: D

QUESTION 4

In caring for a woman and baby day 3 postnatally, she tells you that her baby has not had a bowel action since delivery. Your appropriate response would be:

- A. Reassure the mother that it is quite normal for a baby to not move their bowels until day 5 after a few days of milk feeding
- B. Start a bowel chart, document all findings, and wait another 48 hours before reporting to the physician
- C. Encourage more frequent warm baths for the neonate with gentle abdomen massages
- D. Tell the mother that you will let the physician know, so the baby can be checked for any obstruction

Correct Answer: D

QUESTION 5
