QUESTION 1

Asymmetric encryption algorithm encryption key and decryption key are not the same.

- A. True
- B. False

Correct Answer: A

QUESTION 2

Which of the following techniques can be achieved after a key is compromised, will not affect the security of other keys?

- A. DH (Diffie-Hellman) key exchange and distribution
- B. Perfect forward secrecy (Perfect Forward Secrecy)
- C. Authentication
- D. Identity Protection

Correct Answer: B

QUESTION 3

Local firewall security zones do not contain any interface. Ping firewall on the firewall when an interface IP address, the packet will be given to those inside the firewall module for processing, not to be forwarded. Because they belong to the same security zone, so no need to configure interzone packet filtering can communicate properly.

- A. True
- B. False

Correct Answer: A

QUESTION 4

Interzone packet filtering matching principle is: first find inter-domain Policy, if there is no matching policy, the domain will not find among other strategies, but directly to discard the packet, refused to pass.

- A. True
- B. False

Correct Answer: B

QUESTION 5

Seen through the display ike proposal command results are as follows, the following statements is correct? (Choose two)

priority authentication authentication encryption Diffie-Hellman duration

method algorithm algorithm group (seconds)

default PRE_SHARED SHA DES_CBC MODP_768 86400

A. Authentication algorithm is SHA

B. DES encryption algorithm

C. DH group using group2

D. Use a barbaric mode

Correct Answer: AB
