**QUESTION 1**

A customer has a VSP G800 storage system with an HDT pool with internal SAS drives and a virtualized third-party array using SATA RAID 6. The virtualized array is connected to the VSP G800 using four 8 Gbps FC paths. The customer reports performance problems on an OLTP application deployed on a virtualized server using the HDT pool.

What are two reasons for this problem? (Choose two.)

- A. The workload includes significant random writes to SATA over RAID 6.
- B. The tier relocation is not assisting the OLTP application.
- C. The size of Tier 1 is not sufficient to accumulate all of the hot pages.
- D. The speed of the FC links is insufficient.

Correct Answer: AD

QUESTION 2

A VSP G800 HDT pool contains FMDs, NL-SAS drives, external storage with 15K 600 GB SAS drives, and external storage with 10K 900 GB SAS drives.

Which tier level contains the NL-SAS drives in this configuration?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: A

QUESTION 3

A mission critical SQL server application that resides in a three-tier HDT pool is showing response time spikes that may be related to I/O activity.

Which three Hitachi Tuning Manager reports would you use to determine the problem? (Choose three.)

- A. IOPS by dataset.
- B. IOPS by V-Vol
- C. IOPS by pool
- D. IOPS by tier
- E. IOPS by parity group

Correct Answer: CDE

QUESTION 4

What are two benefits of placing transaction log files on RAID 1+0 disks for Microsoft SQL Server databases rather than RAID 5 disks? (Choose two.)

- A. Multiple transaction log files are supported.
- B. Faster recovery after disk hardware failure is realized.
- C. Capacity utilization rates are improved.
- D. Microsoft recommendations are followed.

Correct Answer: AB

QUESTION 5

You are designing a VSP G1000 solution for a customer and you need to determine the appropriate disk type and RAID level.

What information do you need to design the solution? (Choose three.)

- A. type of workloads
- B. workloads read-write ratio
- C. operating systems used in the environment
- D. fan-in and fan-out ratios
- E. expected I/O rates

Correct Answer: ABE
