**QUESTION 1**

A customer has ordered a 20-node HCP system. You have a limited amount of time to perform the installation. Which action should you take to save time?

- A. Create a core software CD for each node.
- B. Create an appliance OS CD for each node.
- C. Assign all nodes the same IP back-end addresses.
- D. Assign all nodes the same IP front-end addresses.

Correct Answer: B

QUESTION 2

Your customer deleted a replication link running between two HCP systems. Which two statements are true relating to the tenants and namespaces previously included in the link? (Choose two.)

- A. The same replication link can be re-established to resume replication.
- B. The tenants and directories included in the deleted link cannot be replicated again to the same replica unless they are first deleted from that replica;
- C. The HCP tenants and namespace included in the link remain and become read-write on both the primary system and the replica;
- D. The HCP tenants and namespace included in the link remain read-write on the primary system and read-only on the replica;

Correct Answer: BC

QUESTION 3

You have performed an upgrade on a customer's HCP. You complete the upgrade and verify that all the nodes are online and then give the system back to the customer. A few minutes later, the customer complains that they can read existing content but they cannot create new content on the HCP. Which step was missed?

- A. The install user password was changed.
- B. The upgrade was not committed.
- C. The rollback was not performed.
- D. The system management console is disabled.

Correct Answer: B

QUESTION 4

Which OS LUN size do all HCP 300 configurations use?

- A. 20 GB
- B. 30 GB
- C. 50 GB
- D. 400 GB

Correct Answer: B

QUESTION 5

When referring to replication topologies, how many outbound links can a HCP system have?

- A. 1 outbound link
- B. 2 outbound links
- C. 4 outbound links
- D. 5 outbound links

Correct Answer: A
