QUESTION 1

A customer is replicating data between sites using Universal Replicator. They are using CCI at each site running on Solaris servers with korn shell; both CCI servers are also used to control ShadowImage pairs on each array. The CCI device group is named UR_db01 and each server is using the horcm2 daemon for the Universal Replicator pairs. Which two sets of commands will set the correct parameters and display the status of the Universal Replicator pairs in the CCI device group? (Choose two.)

A. pairdisplay -g UR_db01 -IM2

B. pairdisplay -g UR_db01 -IH2

C. unset HORCMINST; export HORCC_MRCF=2; pairdisplay -g UR_db01

D. export HORCMINST=2; unset HORCC_MRCF; pairdisplay -g UR_db01

Correct Answer: BD

QUESTION 2

What are two purposes of a TrueCopy Asynchronous Consistency Group? (Choose two.)

A. It controls multiple volume pairs as a single entity.

B. It provides a real-time copy of the P-VOL on the S-VOL.

C. It allows priority to be assigned to a group of volume pairs.

D. It ensures data is written to the S-VOL in a consistent manner.

Correct Answer: AD

QUESTION 3

A customer wishes to create copies using Copy-on-Write SnapShot of a database containing a large number of changes -- about 50 percent for each day. The customer also wants to keep five copies of the database though access to the copies is not high. Which statement is correct?

A. The pool should reside on external storage to keep costs low.

B. The pool logical volumes should be the same size as the production logical volumes.

C. The database should be copied using ShadowImage and not Copy-on-Write SnapShot.

D. The pool should be at least three times the size of the database if Copy-on-Write SnapShot is used.

Correct Answer: D

QUESTION 4

A customer acquired an Hitachi Storage Cluster (HSC) for Microsoft Environments solution to use for long-distance clustering. There are concerns about how to handle issues when links are down. Which feature addresses this concern?

A. quorum disks

B. majority node sets

C. TrueCopy cluster agent

D. TrueCopy Asynchronous in-order delivery of data

Correct Answer: B

QUESTION 5

A customer is considering using TrueCopy to a site 10km distant for an application that has high write content with fairly severe SLAs. Which two must be considered? (Choose two.)

A. Consistency Groups must be used.

B. A link with minimum latency must be used.

C. A link with maximum bandwidth must be used.

D. The database buffers must be flushed frequently to ensure consistency.

Correct Answer: BC
