**QUESTION 1**

A customer is concerned about a large number of changes being made daily to production systems over a period of three weeks. The customer decides to make Copy-on-Write SnapShot copies of the database at the start of every day to easily restore the most recent version should it be necessary. Each copy must be kept for one week. The average change to the database is 10 percent daily. The database is 10TB in size. Which two considerations are relevant? (Choose two.)

- A. The pool should be defined as being 7TB in size.
- B. The pool should be defined as being 10TB in size.
- C. The pool should be on separate parity groups than the production volumes.
- D. The pool should be defined on the same type of RAID groups as the production database.

Correct Answer: BC

QUESTION 2

A customer is planning to use Universal Replicator for Disaster Recovery of a normal transactional database (e.g. Oracle, DB2). Which two must be included in the same Journal Group? (Choose two.)

- A. data files
- B. transaction logs
- C. database dumps
- D. application binaries

Correct Answer: AB

QUESTION 3

A customer is replicating data between sites using TrueCopy. The TrueCopy Command Control Interface (CCI)

device group name is TC_db01. During a production downtime period, the customer suspended the TrueCopy pairs and modified the contents of the secondary volumes. The customer now wants to replicate the changed data back to the production array. Which command should be issued from the recovery CCI server to replicate just the changes from the TrueCopy secondary volumes back to the original primary volumes?

- A.
horctakeover -g TC_db01 -S
- B.
pairresync -g TC_db01 -swapp

C.

pairresync -g TC_db01 -swaps

D.

horctakeover -g TC_db01 -swapp

Correct Answer: C

QUESTION 4

You are planning to install HiCommand Protection Manager (HPtM) software to protect Microsoft SQL and Microsoft Exchange servers. Which option contains the necessary components?

- A. SQL and Exchange Modules and Copy Controller agent
- B. Console, Copy Controller, VSS agent for MS Exchange and SQL
- C. SQL and Exchange Modules, ShadowImage and Copy-on-Write SnapShot
- D. Console, Copy Controller, MS Exchange server and SQL server options, Raid Manager Shadow Copy provider

Correct Answer: D

QUESTION 5

A customer asks you to review a plan for installing HiCommand Protection Manager (HPtM) software to protect Microsoft Exchange 2003. You are aware that Exchange 2003 is a very critical business application for this customer. Their plan is to use one large LUN for the public store and check point files and second large LUN for the mail box store and the transaction log. Which solution will provide the customer with maximum protection?

- A. The customer should use four different mounted LUNs: one for public stores, one for mailbox stores, one for checkpoint files, and one transaction log files.
- B. The customer should use three different mounted LUNs: one for public stores, one for mailbox stores and checkpoint files, and one for transaction log files.
- C. The customer should use three different mounted LUNs: one for public stores and mailbox stores, one for checkpoint files, and one for transaction log files.
- D. The customer should use four different mounted LUNs: two LUSE LUNs for public and mailbox stores, one for checkpoint files, and one for transaction log files

Correct Answer: A
