**QUESTION 1**

The write I/O workload imposed by the host to the primary Universal Storage Platform of a Three Data Center (3DC) configuration is 150 MB/sec, with the maximum size of Journal Groups being 700GB. Which two configurations meet the requirements? (Choose two.)

- A. Journal Groups made with one 7+1 (146GB) array groups. Primary to secondary Universal Replicator paths made with 2 GB/s Fibre Channel links.
- B. Journal Groups made with eight Journal Volumes on four 7+1 (72GB 15Krpm) array groups. Primary to secondary Universal Replicator paths made with 2 GB/s Fibre Channel links.
- C. Journal Groups made with twelve Journal Volumes on four 7+1 (72GB 15Krpm) array groups. Primary to secondary Universal Replicator paths made with 1GB/s FCIP compressed links.
- D. Journal Groups made with sixteen Journal Volumes on two 7+1 (146GB) array groups. Primary to secondary Universal Replicator paths made with 1GB/s Fibre Channel links.

Correct Answer: BC

---

**QUESTION 2**

What are three key points a customer must consider when establishing a Three Data Center (3DC) Business Continuity Solution)? (Choose three.)

- A. The customer must decide which type of 3DC to install.
- B. The customer must decide the size of the metadata area on each journal volume.
- C. The customer must decide the ratio of metadata to real data on each journal volume.
- D. The customer must decide the link type and performance between the local and distant USP.
- E. The customer must decide the type and number of Parity Groups necessary to obtain the size and performance of the Journal Groups.

Correct Answer: ADE

---

**QUESTION 3**

An Hitachi Data Systems customer is implementing a TrueCopy Asynchronous solution. They want to know if the bandwidth of their remote links is sufficient for their configuration. Which two criteria are relevant to the bandwidth of TrueCopy Asynchronous remote links? (Choose two.)

- A. the average LUN size
- B. the average block size of replicated data
- C. the peak number of write I/Os per second
- D. the number of TrueCopy Asynchronous pairs

Correct Answer: BC

---

#### QUESTION 4

A customer has a server cluster, what are two features of a quorum disk? (Choose two.)

- A. It must reside on a RAID disk.
- B. It must be accessible by all nodes.
- C. It contains the status of all nodes in a cluster.
- D. A copy must always be available to all nodes.

Correct Answer: BC

---

#### QUESTION 5

A customer asks you to review a plan for installing HiCommand Protection Manager (HPtM) software to protect Microsoft Exchange 2003. You are aware that Exchange 2003 is a very critical business application for this customer. Their plan is to use one large LUN for the public store and check point files and second large LUN for the mail box store and the transaction log. Which solution will provide the customer with maximum protection?

- A. The customer should use four different mounted LUNs: one for public stores, one for mailbox stores, one for checkpoint files, and one transaction log files.
- B. The customer should use three different mounted LUNs: one for public stores, one for mailbox stores and checkpoint files, and one for transaction log files.
- C. The customer should use three different mounted LUNs: one for public stores and mailbox stores, one for checkpoint files, and one for transaction log files.
- D. The customer should use four different mounted LUNs: two LUSE LUNs for public and mailbox stores, one for checkpoint files, and one for transaction log files

Correct Answer: A
