QUESTION 1

A customer acquired an Hitachi Storage Cluster (HSC) for Microsoft Environments solution to use for long-distance clustering. There are concerns about how to handle issues when links are down. Which feature addresses this concern?

- A. quorum disks
- B. majority node sets
- C. TrueCopy cluster agent
- D. TrueCopy Asynchronous in-order delivery of data

Correct Answer: B

QUESTION 2

A customer is using ShadowImage on a Universal Storage Platform 1100 to create point-in-time copies of a database every two hours. The production data is contained on 72GB RAID-1 parity groups and the secondary volumes are contained on 300GB RAID-6 parity groups. The customer is running the latest Command Control Interface (CCI) version on a Solaris server using the korn shell. The CCI device group name for the ShadowImage volume is SI_db01. The customer discovers data corruption on the production volumes and wants to restore from the last ShadowImage copy while maintaining RAID-1 for the production volumes. Which two CCI commands will accomplish this objective? (Choose two.)

- A. pairresync -g SI_db01 -fq quick -restore
- B. pairresync -g SI_db01 -fq normal -restore
- C. export HORCC_REST=QUICK; pairresync -g SI_db01 -restore
- D. export HORCC_REST=NORMAL; pairresync -g SI_db01 -restore

Correct Answer: BD

QUESTION 3

An Hitachi Data Systems customer is implementing a TrueCopy Extended Distance solution on an Adaptable Modular Storage (AMS) system. Which configuration is supported?

- A. TrueCopy Extended Distance with 20 Consistency Groups.
- B. TrueCopy Extended Distance Consistency Group pairs in parallel to TrueCopy Synchronous pairs.
- C. TrueCopy Extended Distance Consistency Group with a ShadowImage copy taken from the SVOL.
- D. Two or more TrueCopy Extended Distance Consistency Groups defined with opposite copy direction.

Correct Answer: D

**QUESTION 4**

A customer would like to automate the diskpart.exe command to import and activate suspended ShadowImage secondary volumes in a Windows CCI script. Which diskpart.exe subcommand should be used to scan for new disks on the recovery server prior to mounting the secondary volumes?

- A. qry
- B. scan
- C. query
- D. rescan

Correct Answer: D

QUESTION 5

An Hitachi Data Systems customer is implementing a TrueCopy Asynchronous solution. They want to know if the bandwidth of their remote links is sufficient for their configuration. Which two criteria are relevant to the bandwidth of TrueCopy Asynchronous remote links? (Choose two.)

- A. the average LUN size
- B. the average block size of replicated data
- C. the peak number of write I/Os per second
- D. the number of TrueCopy Asynchronous pairs

Correct Answer: BC
