QUESTION 1

On the Storage Navigator frame for a TrueCopy pair operation, the "Status" column indicates PDUB. What is the status of the pairs indicating PDUB?

A. This is a TrueCopy LUSE status of a pair suspended error.

B. This status indicates that the TrueCopy pair is in the initial copy.

C. One or more LDEV pairs are SMPL on a TrueCopy LUSE volume.

D. The status of the TrueCopy software LUSE volume is in the initial copy.

Correct Answer: C

QUESTION 2

A customer uses Universal Replicator for Disaster Recovery for several mission critical applications. A disaster occurs at the production site and network communication is lost between the sites. Which two actions should be used to split the Universal Replicator pairs from the recovery site so the secondary volumes can be used for application recovery? (Choose two.)

A. Issue a horctakeover -S command from the recovery site CCI server.

B. Issue a horctakeover -S command from the recovery site Storage Navigator.

C. Suspend the Universal Replicator pairs with S-VOL write enabled from the recovery site CCI Server.

D. Delete the Universal Replicator pairs from the secondary site using the recovery site Storage Navigator.

Correct Answer: AD

QUESTION 3

When integrating NetBackup with HiCommand Protection Manager (HPtM), which two options must you specify on the backup Linkage tab? (Choose two.)

A. the backup product name

B. the number of backup policies in use

C. the backup version and backup vendor

D. the number of days to restore the backup catalog

Correct Answer: AD

QUESTION 4

What are two purposes of a TrueCopy Asynchronous Consistency Group? (Choose two.)

A. It controls multiple volume pairs as a single entity.

B. It provides a real-time copy of the P-VOL on the S-VOL.

C. It allows priority to be assigned to a group of volume pairs.

D. It ensures data is written to the S-VOL in a consistent manner.

Correct Answer: AD

QUESTION 5

A customer has a 20TB database at his primary site. The database is copied using TrueCopy to a second site about 20km away. There are problems with the link to the second site. The second copy of the database should always be the same as the primary copy. Which solution should be implemented?

A. Specify FENCELEVEL=DATA on the TrueCopy links.

B. Specify FENCELEVEL=NEVER on the TrueCopy links.

C. Create a third copy of the database using ShadowImage at the primary site.

D. Create a third copy of the database using Universal Replicator at a third site.

Correct Answer: A
