QUESTION 1

A client has a requirement to deploy versions of their app to different regions around the World. Which Heroku Enterprise feature would an Architect recommend to accomplish this?

- A. Using a Heroku StMM Space an app can be deployed to a specific region at the time of app creation.
- B. When creating a Heroku Private Space, you can determine the specific geographic location for the space
- C. You can changed the region for any app in any runtime by using the Heroku CLI.
- D. Using the Common Runtime, an app will automatically be deployed to multiple regions.

Correct Answer: B

QUESTION 2

For which two use cases should an Architect recommend using Heroku Redis? (Choose two.)

- A. Providing long-term data warehousing
- B. Adding jobs to a queue
- C. Providing a data cache layer
- D. Querying relational data

Correct Answer: AD

QUESTION 3

A client requires that their web application's logs are accessible only from within the same isolated network as the application itself.

Which solution should an Architect recommend in this scenario?

- A. Deploy the application to a Private Space. Provide the Private Space's stable outbound IPs to Heroku's Logplex router to block all logs originating from the Private Space.
- B. Deploy the application to a Shield Private Space with Private Space Logging enabled. Forward logs to a destination within the Shield Private Space.
- C. Deploy the application to a Private Space. Connect the Private Space to an on-premise logging system using VPN and specify it as a log drain.
- D. Deploy the application to a Private Space. Enable Internal Routing to prevent the application's logs from being forwarded outside of the Private Space.

Correct Answer: C

QUESTION 4

A company currently uses, and will continue to use, the MulesoftAnypoint Platform integration throughout their architecture. They want to use Heroku Connect to help them integrate Heroku apps with Salesforce apps. What is a benefit of introducing Heroku Connect in this environment?

- A. Heroku Connect provides Salesforce a bidirectional synchronization between Platform Events on Salesforce and Apache Kafka on Heroku
- B. HerokuConnect provides Mulesoft an endpoint that is easily consumable by a back-end integration tool
- C. Heroku Connect provides Salesforce a declarative bidirectional synchronization with Postgres and data proxy capability via Heroku Connect External Objects.
- D. Heroku Connect has a Microsoft connector for access to Heroku Postgres Heroku Redis, and Apache Kafka on Heroku

Correct Answer: C

QUESTION 5

A client runs an application on a background worker dyno. The application allows its users to request personalized information as a PDF. At peak usage, the app processes millions of requests at once. The resulting number of requests has caused a bottleneck that is impacting its performance.

Which two solutions can an Architect recommend to resolve the bottleneck and improve performance? (Choose two.)

- A. Increase the number of workers to consume the job faster.
- B. Move the application to a Private Space.
- C. Add Heroku Redis as a job queue.
- D. Add a CDN add-on from the Elements marketplace.

Correct Answer: AB
