**QUESTION 1**

A client wants to create a scalable set of microservices that communicate with each other, where multiple microservices have a public REST API. Which architecture strategy allows this on Heroku?

- A. Each microservice is a separate Heroku app. The microservices communicate by using Apache Kafka as a message bus.
- B. Each microservice is a separate process type in a single Heroku app. The microservices communicate by using Redis as a message bus.
- C. Each microservice is a separate private space. The microservices communicate by using DNS Service Discovery.
- D. Each microservice is a separate process in a single Heroku app. The microservices communicate by using shared memory.

Correct Answer: C

QUESTION 2

A RESTful API is:

- A. A methodology (or maximizing the effectiveness of any vacation
- B. An Actually Pretty Informative meditation session
- C. How the web displays data in a hierarchical format readable by both people and machines
- D. A web-based service that provides standard ways for clients to make requests and receive responses

Correct Answer: A

QUESTION 3

Universal Containers has multiple Heroku applications that use the same Heroku Postgres database. One of those applications, SFDC-sync, uses Heroku Connect to sync the data between a Salesforce org and the Heroku Postgres database. If the SFDC-sync app is deleted, Heroku Connect will stop syncing data. What is another consequence of deleting the SFDC-sync app?

- A. All tables synced with Heroku Connect will be removed from the Heroku Postgres database
- B. Existing data will remain in both locations.
- C. All synced objects will be removed from the Salesforce org
- D. All tables will be removed from the Heroku Postgres database

Correct Answer: A
