QUESTION 1

Universal Containers wants the ability for their Field Technicians to log sales opportunities associated with their Work Orders.

What configuration should a Consultant implement so Field Technicians can easily achieve this through the Field Service mobile app?

- A. Quick Action on Opportunity to Create Work Order
- B. Quick Action on Opportunity to Create Work Order Line Item
- C. Quick Action on Work Order to Create Opportunity
- D. Quick Action on Work Order Line Items to Create Opportunity

Correct Answer: C

QUESTION 2

When creating a Private Space, what is a valid reason to specify a region other than the default region?

- A. Private Spaces restrict inbound traffic to the current region.
- B. Heroku pricing varies by region.
- C. Running an application closer to its intended users can reduce latency.
- D. Available compute resources vary by region.

Correct Answer: C

QUESTION 3

To satisfy the requirements of an upcoming compliance audit, a client must provide a record of all interactive commands run against a production application in the last six months. Which Heroku feature should an Architect recommend to help with this use case?

- A. Heroku Shield keystroke logging
- B. Dataclips
- C. Private Space Logging
- D. SSH tunneling using Heroku Exec

Correct Answer: A

QUESTION 4

A client's Heroku web application displays data that is fetched from a back-end file storage system. The client now wants this data to be viewable, but not editable, from their Salesforce org. Which recommendation should an Architect make in this scenario?

- A. Replicate the files to tables in a Heroku Postgres database, and use Heroku Connect to synchronize the tables to the Salesforce org.
- B. Store all file URLs in a Heroku Postgres table, and use Heroku Connect to synchronize the table to the Salesforce org.
- C. Replicate the files to tables in a Heroku Postgres database, and use Heroku External Objects to expose the tables to the Salesforce org.
- D. Replicate the files to the application's local filesystem, and use worker dynos to periodically sync them to the Salesforce org.

Correct Answer: A

QUESTION 5

A client wants to create a secure network connection between Heroku applications running in a Private Space and an AWS VPC. Which Heroku feature should an Architect recommend to create the connection?

- A. Internal Routing
- B. Private Space Peering
- C. Private Space VPN connections
- D. Heroku Connect

Correct Answer: C
