**QUESTION 1**

Which three documents are required deliverables as part a Hitachi NAS Platform data migration service? (Choose three.)

- A. the file system migration workbook
- B. the network topology diagram
- C. the NAS service workbook
- D. the NAS migration hardware configuration sheet
- E. the hardware inventory sheet

Correct Answer: ACD

QUESTION 2

A customer has 28 independent file servers with various amounts of data on each server and they would like to consolidate with a Hitachi NAS Platform. Which three factors must be considered prior to the consolidation? (Choose three.)

- A. number of concurrent users
- B. type of applications and specific purpose of each application server
- C. server BIOS version
- D. number of mount points and shares
- E. number of concurrent HTTP instances

Correct Answer: ABD

QUESTION 3

A customer is in the planning stage for a Hitachi NAS Platform MetroCluster implementation. You inform them that the maximum number of primary volumes is 256 when using Hitachi NAS Platform software version 8. What is the reason for this?

- A. P-Vol and S-Vol maximum LUN counts must be considered.
- B. MetroCluster only has license codes for 256 LUNs.
- C. Hitachi storage systems only support 256 volumes for replication.
- D. ShadowImage supports 128 copies of data.

Correct Answer: A

QUESTION 4

A customer is planning to use anti-virus scanning on their Hitachi NAS platform. What are three relevant performance considerations? (Choose three.)

- A. the number of anti-virus scanning servers
- B. the processing power of the hardware platform used as an anti-virus scanning server
- C. the bandwidth between the anti-virus scanning servers and the Hitachi NAS platform
- D. using the SMB protocol for anti-virus scanning instead of the RPC protocol
- E. dedicating an EVS for global anti-virus scanning on each cluster node

Correct Answer: ABC

QUESTION 5

You are creating a deployment plan for a new Hitachi NAS Platform customer that will meet their recovery and data consolidation requirements for their NFS and CIFS data. Which two key infrastructure areas must you identify for the design? (Choose two.)

- A. Recovery Point Objective
- B. types of servers
- C. Recovery Time Objective
- D. number of NDS servers

Correct Answer: AC
